Active Defense

M. Taylor Fravel 9780691210339 £22.00 • \$27.95 Trade Paperback Political Science / International Relations December 2020 Princeton University Press

What changes in China's modern defense policy reveal about military organizations and strategy

Active Defense offers the first systematic look at China's military strategy from the mid-twentieth century to today. Exploring the range and intensity of threats that China has faced, M. Taylor Fravel illuminates the nation's past and present military goals, and offers a rich set of cases for deepening the study of how and why states alter their defense policies.

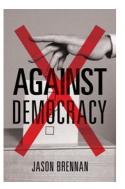

After Kant

Michael Sonenscher 9780691245638 £45.00 • \$55.00 Trade Paperback Philosophy / Political July 2023 Princeton University Press

Tracing the origins of modern political thought through three sets of arguments over history, morality, and freedom

In this wide-ranging work, Michael Sonenscher traces the origins of modern political thought and ideologies to a question, raised by Immanuel Kant, about what is involved in comparing individual human lives to the whole of human history. How can we compare them, or understand the results of the comparison? Kant's question injected a new, future-oriented dimension into existing discussions of prevailing norms, challenging their orientation toward the past. This reversal made Kant's question a bridge between three successive sets of arguments: between the supporters of the ancients and moderns, the classics and romantics, and the Romans and the Germans. Sonenscher argues that the genealogy of modern political ideologies—from liberalism to nationalism to communism—can be connected to the resulting discussions of time, history, and values, mainly in France but also in Germany, Switzerland, and Britain, in the period straddling the French and Industrial revolutions.

What is the genuinely human content of human history? Everything begins somewhere—democracy with the Greeks, or the idea of a *res publica* with the Romans—but these local arrangements have become vectors of values that are, apparently, universal. The intellectual upheaval that Sonenscher describes involved a struggle to close the gap, highlighted by Kant, between individual lives and human history. *After Kant* is an examination of that struggle's enduring impact on the history and the historiography of political thought.

Against Democracy

Jason Brennan 9780691178493 £17.99 • \$20.95 Trade Paperback Philosophy / Political September 2017 Princeton University Press

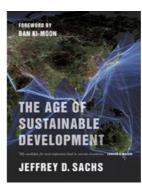

A bracingly provocative challenge to one of our most cherished ideas and institutions

Most people believe democracy is a uniquely just form of government. They believe people have the right to an equal share of political power. And they believe that political participation is good for us—it empowers us, helps us get what we want, and tends to make us smarter, more virtuous, and more caring for one another. These are some of our most cherished ideas about democracy. But Jason Brennan says they are all wrong.

In this trenchant book, Brennan argues that democracy should be judged by its results—and the results are not good enough. Just as defendants have a right to a fair trial, citizens have a right to competent government. But democracy is the rule of the ignorant and the irrational, and it all too often falls short. Furthermore, no one has a fundamental right to any share of political power, and exercising political power does most of us little good. On the contrary, a wide range of social science research shows that political participation and democratic deliberation actually tend to make people worse—more irrational, biased, and mean. Given this grim picture, Brennan argues that a new system of government—epistocracy, the rule of the knowledgeable—may be better than democracy, and that it's time to experiment and find out.

A challenging critique of democracy and the first sustained defense of the rule of the knowledgeable, *Against Democracy* is essential reading for scholars and students of politics across the disciplines.

Featuring a new preface that situates the book within the current political climate and discusses other alternatives beyond epistocracy, *Against Democracy* is a challenging critique of democracy and the first sustained defense of the rule of the knowledgeable.

The Age of Sustainable Development

Jeffrey D. Sachs 9780231173155 £38.00 • \$44.95 Trade Paperback Political Science / Public Policy / Environmental Policy March 2015 Columbia University Press

Jeffrey D. Sachs is one of the world's most perceptive and original analysts of global development. In this major new work he presents a compelling and practical framework for how global citizens can use a holistic way forward to address the seemingly intractable worldwide problems of persistent extreme poverty, environmental degradation, and political-economic injustice: sustainable development.

Sachs offers readers, students, activists, environmentalists, and policy makers the tools, metrics, and practical pathways they need to achieve Sustainable Development Goals. Far more than a rhetorical exercise, this book is designed to inform, inspire, and spur action. Based on Sachs's twelve years as director of the Earth Institute at Columbia University, his thirteen years advising the United Nations secretary-general on the Millennium Development Goals, and his recent presentation of these ideas in a popular online course, *The Age of Sustainable Development* is a landmark publication and clarion call for all who care about our planet and global justice.

The Ages of Globalization

Jeffrey D. Sachs 9780231193740 £22.00 • \$26.95 Hardcover Political Science / Globalization June 2020 Columbia University Press

Today's most urgent problems are fundamentally global. They require nothing less than concerted, planetwide action if we are to secure a long-term future. But humanity's story has always been on a

development, turns to world history to shed light on how we can meet the challenges and opportunities

Sachs takes readers through a series of seven distinct waves of technological and institutional change, starting with the original settling of the planet by early modern humans through long-distance

starting with the original setting of the planet by early model in humans through long-distance migration and ending with reflections on today's globalization. Along the way, he considers how the interplay of geography, technology, and institutions influenced the Neolithic revolution; the role of the horse in the emergence of empires; the spread of large land-based empires in the classical age; the rise of global empires after the opening of sea routes from Europe to Asia and the Americas; and the

industrial age. The dynamics of these past waves, Sachs demonstrates, offer fresh perspective on the ongoing processes taking place in our own time—a globalization based on digital technologies. Sachs

emphasizes the need for new methods of international governance and cooperation to prevent conflicts and to achieve economic, social, and environmental objectives aligned with sustainable development.

The Ages of Globalization is a vital book for all readers aiming to make sense of our rapidly changing

global scale. In this book, Jeffrey D. Sachs, renowned economist and expert on sustainable

ithms for the People

Algorithms for the People

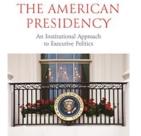

Josh Simons 9780691244006 £25.00 • \$29.95 Hardcover Political Science / Public Policy / Communication Policy January 2023 Princeton University Press

How to put democracy at the heart of AI governance

Artificial intelligence and machine learning are reshaping our world. Police forces use them to decide where to send police officers, judges to decide whom to release on bail, welfare agencies to decide which children are at risk of abuse, and Facebook and Google to rank content and distribute ads. In these spheres, and many others, powerful prediction tools are changing how decisions are made, narrowing opportunities for the exercise of judgment, empathy, and creativity. In *Algorithms for the People*, Josh Simons flips the narrative about how we govern these technologies. Instead of examining the impact of technology on democracy, he explores how to put democracy at the heart of AI governance

Drawing on his experience as a research fellow at Harvard University, a visiting research scientist on Facebook's Responsible AI team, and a policy advisor to the UK's Labour Party, Simons gets under the hood of predictive technologies, offering an accessible account of how they work, why they matter, and how to regulate the institutions that build and use them.

He argues that prediction is political: human choices about how to design and use predictive tools shape their effects. Approaching predictive technologies through the lens of political theory casts new light on how democracies should govern political choices made outside the sphere of representative politics. Showing the connection between technology regulation and democratic reform, Simons argues that we must go beyond conventional theorizing of AI ethics to wrestle with fundamental moral and political questions about how the governance of technology can support the flourishing of democracy

\infty William G. Howell 🥪

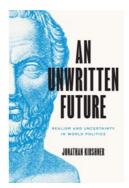

The American Presidency William G. Howell

9780691225579 £38.00 • \$45.00 Trade Paperback Political Science / American Government / Executive Branch February 2023 Princeton University Press

How institutions shape the American presidency

This incisive undergraduate textbook emphasizes the institutional sources of presidential power and executive governance, enabling students to think more clearly and systematically about the American presidency at a time when media coverage of the White House is awash in anecdotes and personalities. William Howell offers unparalleled perspective on the world's most powerful office, from its original design in the Constitution to its historical growth over time; its elections and transitions to governance; its interactions with Congress, the courts, and the federal bureaucracy; and its persistent efforts to shape public policy. Comprehensive in scope and rooted in the latest scholarship, *The American Presidency* is the perfect guide for studying the presidency at a time of acute partisan polarization and popular anxiety about the health and well-being of the republic.

- Focuses on the institutional structures that presidents must navigate, the incentives and opportunities that drive them, and the constraints they routinely confront Shows how legislators, judges, bureaucrats, the media, and the broader public shape the
- contours and limits of presidential power Encourages students to view the institutional presidency as not just an object of study but
- a way of thinking about executive politics Highlights the lasting effects of important historical moments on the institutional
- presidency
- Enables students to grapple with enduring themes of power, rules, norms, and organization that undergird democracy

An Unwritten Future

Jonathan Kirshner 9780691166773 £35.00 • \$39.95 Hardcover Political Science / International Relations September 2022 Princeton University Press

An argument for the classical realist approach to world politics

An Unwritten Future offers a fresh reassessment of classical realism, an enduring approach to understanding crucial events in the international political arena. Jonathan Kirshner identifies the fundamental flavs of classical realism's would-be successors and shows how this older, more nuanced and sophisticated method for studying world politics better explains the formative events of the past. Kirshner also reveals how this approach is ideally equipped to comprehend the vital questions of the present—such as the implications of China's rise, the ways that social and economic change alter the balance of power and the nature of international conflict, and the consequences of the end of the US-led postwar order for the future of world politics.

Laying out realism's core principles, Kirshner discusses the contributions of the perspective's key thinkers, including Thucydides, Hans Morgenthau, and Raymond Aron, among others. He illustrates how a classical realist approach gives new insights into major upheavals of the twentieth century, such as Britain's appeasement of Nazi Germany and America's ruinous involvement in Vietnam. Kirshner also addresses realism's limits and explores contemporary issues, including the ascent of great power challengers, the political implications of globalization, and the diffusion of power in modern world politics

A reexamination of the realist tradition, with a renewed emphasis on the crucial roles played by uncertainty, contingency, and contestation. An Unwritten Future demonstrates how a once-popular school of thought provides invaluable insights into pressing real-world problems.

ANOTHER UNIVERSALISM

SEYLA BENHABIB AND THE FUTURE OF CRITICAL THEORY

EDITED BY STEFAN EICH, ANNA JURKEVICS, NISHIN NATHWANI, AND NICA SIEGEL

and universality.

vision

Another Universalism

Stefan Eich 9780231212793 £32.00 • \$38.00 Trade Paperback Political Science / History & Theory December 2023 Columbia University Press

Seyla Benhabib's ongoing work has expanded the range and scope of critical theory beyond its origins to address questions of gender, migration, and difference. This book brings together an ensemble of

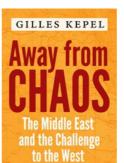

leading theorists and younger voices to explore new dimensions of Benhabib's thought across critical

Another Universalism provides both a wide-ranging and comprehensive engagement with Benhabib's path-breaking interventions and a panoramic tour of the cutting edge of critical theory today.

Contributors take part in key debates about the field's past and future, tackling subjects such as the relationship between democracy and cosmopolitanism, the role of law in emancipatory struggles, human domination of nature, the deprovincialization of critical theory concerning questions of race and empire, as well as Hannah Arendt's continuing significance. Covering a wide range of debates and

themes, *Another Universalism* is united by a core question: How can universal norms of human freedom, equality, and dignity be reconciled with particular contexts, especially ones of exclusion, difference, and adversity? Searching for universalisms that emerge from the concrete struggles of emancipatory movements, this book points toward an expansive, inclusive, and radical democratic

theory, feminism, and democratic theory, foregrounding the intricate relationship between critique

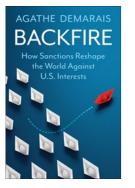

Away from Chaos

Gilles Kepel 9780231197038 £22.00 • \$26.00 Trade Paperback Political Science / World / Middle Eastern September 2023 Columbia University Press

The Middle East is one of the world's most volatile regions. In recent years, from the optimism and then crushing disappointment of the Arab uprisings through the rise and fall of the Islamic State, it has presented key international security challenges. With the resilient jihadi terror threat, large-scale migration due to warfare and climate change, and fierce competition for control over oil, it promises to continue to be a powder keg. What ignited this instability?

Away from Chaos is a sweeping political history of four decades of Middle East conflict and its worldwide ramifications. Gilles Kepel, called "France's most famous scholar of Islam" by the New York Times, offers a clear and persuasive narrative of the long-term causes of tension while seamlessly incorporating on-the-ground observations and personal experiences from the people who lived through them.

From the Yom Kippur/Ramadan war of 1973 to the aftermath of the Arab Spring, Away from Chaos weaves together the various threads that run through Middle East politics and ties them to their implications on the global stage. With keen insight stemming from decades of experience in the region, Kepel puts these chaotic decades in perspective and illuminates their underlying dynamics. He also considers the prospects of emerging from this long-lasting turmoil and for the people of the Middle East and the world to achieve a more stable future.

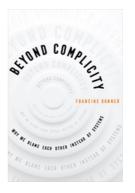

Backfire

Agathe Demarais 9780231199902 £25.00 • \$30.00 Hardcover Political Science / International Relations November 2022 Columbia University Press

Sanctions have become the go-to foreign policy tool for the United States. Coercive economic measures such as trade tariffs, financial penalties, and export controls affect large numbers of companies and states across the globe. Some of these penalties target nonstate actors, such as Colombian drug cartels and Islamist terror groups; others apply to entire countries, including North Korea, Iran, and Russia. U.S. policy makers see sanctions as a low-cost tactic, but in reality these measures often fail to achieve their intended goals—and their potent side effects can even harm American interests.

Backfire explores the surprising ways sanctions affect multinational companies, governments, and ultimately millions of people around the world. Drawing on interviews with experts, policy makers, and people in sanctioned countries, Agathe Demarais examines the unintended consequences of the use of sanctions as a diplomatic weapon. The proliferation of sanctions spurs efforts to evade them, as states and firms seek ways to circumvent U.S. penalties. This is only part of the story. Sanctions also reshape relations between countries, pushing governments that are at odds with the U.S. closer to each other—or, increasingly, to Russia and China.

Full of counterintuitive insights spanning a wide range of topics, from Russia's invasion of Ukraine to Iran's COVID response and China's cryptocurrency ambitions, *Backfire* reveals how sanctions are transforming geopolitics and the global economy—as well as diminishing U.S. influence. This insider's account is an eye-opening, accessible, and timely book that sheds light on the future of sanctions in an increasingly multipolar world.

Beyond Complicity

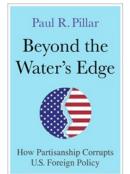

Francine Banner 9780520399464 £25.00 • \$29.95 Trade Paperback Political Science January 2024 University of California Press

An ambitious study of our obsession with complicity that shows how we can all become "good accomplices."

Beyond Complicity is a fascinating cultural diagnosis that identifies our obsession with complicity as a symptom of a deeply divided society. The questions surrounding what it means to be legally complicit are the same ones we may ask ourselves as we evaluate our own and others' responsibility for inherited and ongoing harms, such as racism, sexism, and climate change: What does it mean that someone "knew" they were contributing to wrongdoing? How much involvement must a person have in order to be complicit? At what point are we obligated to intervene?

Francine Banner ties together pop culture, politics, law, and social movements to provide a framework for thinking about what we know intuitively: that our society is defined by crisis, risk, and the quest to root out hazards at all costs. Engaging with legal cases, historical examples, and contemporary case studies, *Beyond Complicity* unfolds the complex role that complicity plays in US law and society today, offering suggestions for how to shift focus away from blame and toward positive, lasting systemic change.

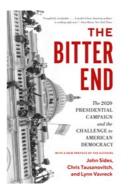

Beyond the Water's Edge

Paul Pillar 9780231213165 £30.00 • \$35.00 Hardcover Political Science / International Relations October 2023 Columbia University Press

Intense partisanship is a familiar part of the contemporary United States, but its consequences do not stop at the country's borders. The damage now extends to U.S. relations with the rest of the world. Too often, political leaders place their own party's interest in gaining and keeping power ahead of the national interest.

Paul R. Pillar examines how and why partisanship has undermined U.S. foreign policy, especially over the past three decades. Placing present-day discord in historical perspective going back to the beginning of the republic, *Beyond the Water's Edge* shows that although the corrupting effects of partisan divisions are not new, past leaders were often able to overcome them. Recent social and political trends and developments including the end of the Cold War, however, have contributed to a surge of corrosive partisanship. Pillar demonstrates that its costs range from the prolongation of war and crisis to the intrusion of foreign influence and the undermining of democracy. He explores the ways other governments respond to inconsistency in U.S. foreign policy, the consequences of domestic division for U.S. global leadership, and how the corruption of American democracy also weakens democracy worldwide. Pillar considers possible remedies but draws the sobering conclusion that entrenched political sectarianism makes their adoption unlikely. Offering insightful analysis of the decline of U.S. foreign relations, *Beyond the Water's Edge* is an important book for all readers concerned about the state of the American political system.

The Bitter End

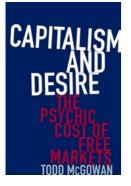

John Sides 9780691243733 £16.99 • \$19.95 Trade Paperback Political Science / Political Process / Campaigns & Elections September 2023 Princeton University Press

What an intensely divisive election portends for American politics

The year 2020 was a tumultuous time in American politics. It brought a global pandemic, protests for racial justice, and a razor-thin presidential election outcome. It culminated in an attack on the U.S. Capitol that attempted to deny Joe Biden's victory. *The Bitter End* explores the long-term trends and short-term shocks that shaped this dramatic year and what these changes could mean for the future.

John Sides, Chris Tausanovitch, and Lynn Vavreck demonstrate that Trump's presidency intensified the partisan politics of the previous decades and the identity politics of the 2016 election. Presidential elections have become calcified, with less chance of big swings in either party's favor. Republicans remained loyal to Trump and kept the election close, despite Trump's many scandals, a recession, and the pandemic. But in a narrowly divided electorate even small changes can have big consequences. The pandemic was a case in point: when Trump pushed to reopen the country even as infections mounted, support for Biden increased. The authors explain that, paradoxically, even as Biden's win came at a time of heightened party loyalty, there remained room for shifts that shaped the election's outcome. Ultimately, the events of 2020 showed that instead of the country coming together to face national challenges—the pandemic, George Floyd's murder, and the Capitol riot—these challenges only reinforced divisions.

Expertly chronicling the tensions of an election that came to an explosive finish, *The Bitter End* presents a detailed account of a year of crises and the dangerous direction in which the country is headed.

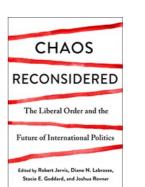

Capitalism and Desire

Todd McGowan 9780231178730 £22.00 • \$27.00 Trade Paperback Philosophy / Political March 2023 Columbia University Press

Despite creating vast inequalities and propping up reactionary world regimes, capitalism has many passionate defenders—but not because of what it withholds from some and gives to others. Capitalism dominates, Todd McGowan argues, because it mimics the structure of our desire while hiding the trauma that the system inflicts upon it. People from all backgrounds enjoy what capitalism provides, but at the same time are told more and better is yet to come. Capitalism traps us through an incomplete satisfaction that compels us after the new, the better, and the more.

Capitalism's parasitic relationship to our desires gives it the illusion of corresponding to our natural impulses, which is how capitalism's defenders characterize it. By understanding this psychic strategy, McGowan hopes to divest us of our addiction to capitalist enrichment and help us rediscover enjoyment as we actually experienced it. By locating it in the present, McGowan frees us from our attachment to a better future and the belief that capitalism is an essential outgrowth of human nature. From this perspective, our economic, social, and political worlds open up to real political change. Eloquent and enlivened by examples from film, television, consumer culture, and everyday life, *Capitalism and Desire* brings a new, psychoanalytically grounded approach to political and social theory.

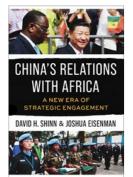

Chaos Reconsidered

Robert Jervis 9780231205993 £30.00 • \$35.00 Trade Paperback Political Science / American Government / Executive Branch July 2023 Columbia University Press

The shock of Donald Trump's election caused many observers to ask whether the liberal international order—the system of institutions and norms established after World War II—was coming to an end. The victory of Joe Biden, a committed institutionalist, suggested that the liberal order would endure. Even so, important questions remained: Was Trump an aberration? Is Biden struggling in vain against irreparable changes in international politics? What does the future hold for the international order?

The essays in *Chaos Reconsidered* answer those questions. Leading scholars assess the domestic and global effects of the Trump and Biden presidencies. The historians put the Trump years and Biden's victory in historical context. Regional specialists evaluate U.S. diplomacy in Asia, Europe, Africa, the Middle East, and Latin America. Others foreground topics such as global right-wing populism, the COVID-19 pandemic, racial inequality, and environmental degradation. International relations theorists reconsider the nature of international politics, pointing to deficiencies in traditional IR methods for explaining world events and Trump's presidency in partnerships, the durability of the liberal international order, the standing and reputation of the United States as a global leader, the implications of China's assertiveness and Russia's aggression, and the prospects for the Biden administration and its successors.

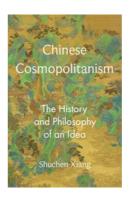

China's Relations with Africa

Joshua Eisenman 9780231210010 £30.00 • \$35.00 Trade Paperback Political Science / World / Asian August 2023 Columbia University Press

Since Xi Jinping's accession to power in 2012, nearly every aspect of China's relations with Africa has grown dramatically. Beijing has increased the share of resources it devotes to African countries, expanding military cooperation, technological investment, and educational and cultural programs as well as extending its political influence.

This book examines the full scope of contemporary political and security relations between China and Africa. David H. Shinn and Joshua Eisenman not only explain the specific tactics and methods that Beijing uses to build its strategic relations with African political and military elites but also contextualize and interpret them within China's larger geostrategy. They argue that the priorities of Chinese leaders—including the conflation of threats to the Communist Party with threats to the country, a growing emphasis on relations in the Global South, and a focus on countering U.S. hegemony—have combined to elevate Africa's importance among policy makers in Beijing.

Ranging from diplomacy and propaganda to arms sales and space cooperation, from increasingly frequent People's Liberation Army Navy port calls in Africa to the rising number of African students studying in China, this book marshals extensive and compelling qualitative and quantitative evidence of the deepening ties between China and Africa. Drawing on two decades of systematic data and hundreds of surveys and in-person interviews, Shinn and Eisenman shed new light on the state of China-Africa relations today and consider what the future may hold.

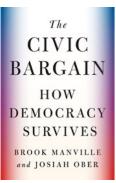

Chinese Cosmopolitanism

Shuchen Xiang 9780691242729 £30.00 • \$35.00 Hardcover Philosophy / Political September 2023 Princeton University Press

A provocative defense of a forgotten Chinese approach to identity and difference

Historically, the Western encounter with difference has been catastrophic: the extermination and displacement of aboriginal populations, the transatlantic slave trade, and colonialism. China, however, took a different historical path. In *Chinese Cosmopolitanism*, Shuchen Xiang argues that the Chinese cultural tradition was, from its formative beginnings and throughout its imperial history, a cosmopolitan melting pot that synthesized the different cultures that came into its orbit. Unlike the West, which cast its collisions with different cultures in Manichean terms of the ontologically irreconcilable difference. The reasons for this, Xiang argues, are philosophical: Chinese philosophy has the conceptual resources for providing alternative ways to understand pluralism.

Xiang explains that "Chinese" identity is not what the West understands as a racial identity; it is not a group of people related by common descent or heredity but rather a hybrid of coalescing cultures. To use the Western discourse of race to frame the Chinese view of non-Chinese, she argues, is a category error. Xiang shows that China was both internally cosmopolitan, embracing distinct peoples into a common identity, and externally cosmopolitan, having knowledge of faraway lands without an ideological need to subjugate them. Contrasting the Chinese understanding of efficacy—described as "harmony"—with the Western understanding of order, she argues that the Chinese sought to gain influence over others by having them spontaneously accept the virtue of one's position. These ideas from Chinese philosophy, she contends, offer a new way to understand today's multipolar world and can make a valuable contribution to contemporary discussions in the critical philosophy of race.

The Civic Bargain Brook Manville

9780691218601 £25.00 • \$29.95 Hardcover Political Science / Political Ideologies / Democracy September 2023 Princeton University Press

A powerful case for democracy and how it can adapt and survive—if we want it to

Is democracy in trouble, perhaps even dying? Pundits say so, and polls show that most Americans believe that their country's system of governance is being "tested" or is "under attack." But is the future of democracy necessarily so dire? In *The Civic Bargain*, Brook Manville and Josiah Ober push back against the prevailing pessimism about the fate of democracy around the world. Instead of an epitaph for democracy, they offer a guide for democratic renewal, calling on citizens to recommit to a "civic bargain" with one another to guarantee civic rights of freedom, equality, and dignity. That bargain also requires them to fulfill the duties of democratic citizenship: governing themselves with no "boss" except one another, embracing compromise, treating each other as civic friends, and investing in civic education for each rising generation.

Manville and Ober trace the long progression toward self-government through four key moments in democracy's history: Classical Athens, Republican Rome, Great Britain's constitutional monarchy, and America's founding. Comparing what worked and what failed in each case, they draw out lessons for how modern democracies can survive and thrive. Manville and Ober show that democracy isn't about getting everything we want; it's about agreeing on a shared framework for pursuing our often conflicting aims. Crucially, citizens need to be able to compromise, and must not treat one another as political enemies. And we must accept imperfection; democracy is never finished but evolves and renews itself continually. As long as the civic bargain is maintained—through deliberation, bargaining, and compromise—democracy will live.

The Collected Works of Spinoza, Volume II Benedictus de Spinoza

9780691167633 £48.00 • \$58.00 Hardcover Philosophy / Political June 2016 Princeton University Press

The second and final volume of the most authoritative English-language edition of Spinoza's writings

The Collected Works of Spinoza provides, for the first time in English, a truly satisfactory edition of all of Spinoza's writings, with accurate and readable translations, based on the best critical editions of the original-language texts, done by a scholar who has published extensively on the philosopher's work.

The centerpiece of this second volume is Spinoza's *Theological-Political Treatise*, a landmark work in the history of biblical scholarship, the first argument for democracy by a major philosopher, and a forceful defense of freedom of thought and expression. This work is accompanied by Spinoza's later correspondence, much of which responds to criticism of the *Theological-Political Treatise*. The volume also includes his last work, the unfinished *Political Treatise*, which builds on the foundations of the *Theological-Political Treatise* to offer plans for the organization of nontyrannical monarchies and aristocracies.

The elaborate editorial apparatus—including prefaces, notes, glossary, and indexes—assists the reader in understanding one of the world's most fascinating, but also most difficult, philosophers. Of particular interest is the glossary-index, which provides extensive commentary on Spinoza's technical vocabulary.

A milestone of scholarship more than forty-five years in the making, *The Collected Works of Spinoza* is an essential edition for anyone with a serious interest in Spinoza or the history of philosophy.

Conservatism

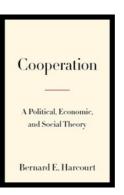

Edmund Fawcett 9780691233994 £18.99 • \$22.95 Trade Paperback Political Science / Political Ideologies / Conservatism & Liberalism April 2022 Princeton University Press

A fresh and sharp-eyed history of political conservatism from its nineteenth-century origins to today's hard Right

For two hundred years, conservatism has defied its reputation as a backward-looking creed by confronting and adapting to liberal modernity. By doing so, the Right has won long periods of power and effectively become the dominant tradition in politics. Yet, despite their success, conservatives have continued to fight with each other about how far to compromise with liberalism and democracy—or which values to defend and how. In *Conservatism*, Edmund Fawcett provides a gripping account of this conflicted history, clarifies key ideas, and illuminates quarrels within the Right today.

Focusing on the United States, Britain, France, and Germany, Fawcett's vivid narrative covers thinkers and politicians. They include the forerunners James Madison, Edmund Burke, and Joseph de Maistre; early friends and foes of capitalism; defenders of religion; and builders of modern parties, such as William McKinley and Lord Salisbury. The book chronicles the cultural critics and radical disruptors of the 1920s and 1930s, recounts how advocates of laissez-faire economics broke the post 1945 consensus, and describes how Donald Trump, Boris Johnson, and their European counterparts are pushing conservatism toward a nation-first, hard Right.

An absorbing, original history of the Right, *Conservatism* portrays a tradition as much at war with itself as with its opponents.

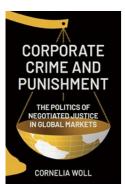

Cooperation

Bernard E. Harcourt 9780231209540 £30.00 • \$35.00 Hardcover Political Science / Political Ideologies May 2023 Columbia University Press

Liberal democracy is in crisis around the world, unable to address pressing problems such as climate change. There is, however, another path—cooperation democracy. From consumer co-ops to credit unions, worker cooperatives to insurance mutuals, nonprofits to mutual aid, countless examples prove that people working together can extend the ideals of participatory democracy and sustainability into every aspect of their lives. These forms of cooperatives do not depend on electoral politics. Instead, they harness the longstanding practices and values of cooperatives: self-determination, democratic participation, equity, solidarity, and respect for the environment.

Bernard E. Harcourt develops a transformative theory and practice that builds on worldwide models of successful cooperation. He identifies the most promising forms of cooperative initiatives and then distills their lessons into an integrated framework: Coöperism. This is a political theory grounded on recognition of our interdependence. It is an economic theory that can ensure equitable distribution of wealth. Finally, it is a social theory that replaces the punishment paradigm with a cooperation paradigm.

A creative work of normative critical theory, *Cooperation* provides a positive vision for addressing our most urgent challenges today. Harcourt shows that by drawing on the core values of cooperation and the power of people working together, a new world of cooperation democracy is within our grasp.

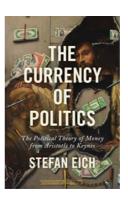

Corporate Crime and Punishment

Cornelia Woll 9780691250328 £35.00 • \$39.95 Hardcover Political Science / International Relations October 2023 Princeton University Press

The geopolitics of American law enforcement and how it changed corporate criminal accountability in other countries

Over the past decade, many of the world's biggest companies have found themselves embroiled in legal disputes over corruption, fraud, environmental damage, tax evasion, or sanction violations. Corporations including Volkswagen, BP, and Credit Suisse have paid record-breaking fines. Many critics of globalization and corporate impunity cheer this turn toward accountability. Others, however, question American dominance in legal battles that seem to impose domestic legal norms beyond national boundaries. In this book, Cornelia Woll examines the politics of American corporate criminal law's extraterritorial reach. As governments abroad seek to respond to US law enforcement actions against their companies, they turn to flexible legal instruments that allow prosecutors to settle a case rather than bring it to court. With her analysis of the international and domestic politics of law enforcement targeting big business, Woll traces the rise of what she calls "negotiated corporate justice" in global markets.

Woll charts the path to this shift through case studies of geopolitical tensions and accusations of "economic lawfare," pitting the United States against the European Union, China, and Japan. She then examines the reactions to the new legal landscape, describing institutional changes in the common law countries of the United Kingdom and Canada and the civil law countries of France, Brazil, and Germany. Through an insightful interdisciplinary analysis of how the prosecution of corporate crime has evolved in the twenty-first century, Woll demonstrates the profound transformation of the relationship between states and private actors in world markets, showing that law is part of economic statecraft in the connected global economy.

The Currency of Politics

Stefan Eich 9780691235431 £18.99 • \$22.95 Trade Paperback Philosophy / Political August 2023 Princeton University Press

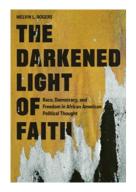

Money in the history of political thought, from ancient Greece to the Great Inflation of the 1970s

In the wake of the 2008 financial crisis, critical attention has shifted from the economy to the most fundamental feature of all market economies—money. Yet despite the centrality of political struggles over money, it remains difficult to articulate its democratic possibilities and limits. *The Currency of Politics* takes readers from ancient Greece to today to provide an intellectual history of money, drawing on the insights of key political philosophers to show how money is not just a medium of exchange but also a central institution of political rule.

Money appears to be beyond the reach of democratic politics, but this appearance—like so much about money—is deceptive. Even when the politics of money is impossible to ignore, its proper democratic role can be difficult to discern. Stefan Eich examines six crucial episodes of monetary crisis, recovering the neglected political theories of money in the thought of such figures as Aristotle, John Locke, Johann Gottlieb Fichte, Karl Marx, and John Maynard Keynes. He shows how these layers of crisis have come to define the way we look at money, and argues that informed public debate about money requires a better appreciation of the diverse political struggles over its meaning.

Recovering foundational ideas at the intersection of monetary rule and democratic politics, *The Currency of Politics* explains why only through greater awareness of the historical limits of monetary politics can we begin to articulate more democratic conceptions of money.

The Darkened Light of

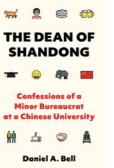

Faith Melvin L. Rogers 9780691219134 £30.00 • \$35.00 Hardcover Political Science / History & Theory September 2023 Princeton University Press

A powerful new account of what a group of nineteenth- and twentieth-century African American activists, intellectuals, and artists can teach us about democracy

Could the African American political tradition save American democracy? African Americans have had every reason to reject America's democratic experiment. Yet African American activists, intellectuals, and artists who have sought to transform the United States into a racially just society have put forward some of the most original and powerful ideas about how to make America live up to its democratic ideals. In *The Darkened Light of Faith*, Melvin Rogers provides a bold new account of African American political through the works and lives of individuals who built this vital tradition—a tradition that is urgently needed today.

The book reexamines how figures as diverse as David Walker, Frederick Douglass, Anna Julia Cooper, Ida B. Wells, W.E.B. Du Bois, Billie Holiday, and James Baldwin thought about the politics, people, character, and culture of a society that so often dominated them. Sharing a light of faith darkened but not extinguished by the tragic legacy of slavery, they resisted the conclusion that America would always be committed to white supremacy. They believed that democracy is always in the process of becoming and that they could use it to reimagine society. But they also saw that achieving racial justice wouldn't absolve us of the darkest features of our shared past, and that democracy must be measured by how skillfully we confront a history that will forever remain with us.

An ambitious account of the profound ways African Americans have reimagined democracy, *The Darkened Light of Faith* offers invaluable lessons about how to grapple with racial injustice and make democracy work.

The Dean of ShandongDaniel A. Bell9780691247120£22.00 • \$27.95HardcoverPolitical Science / Political Ideologies /

Communism, Post-Communism & Socialism

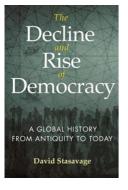

An inside view of Chinese academia and what it reveals about China's political system

March 2023

Princeton University Press

On January 1, 2017, Daniel Bell was appointed dean of the School of Political Science and Public Administration at Shandong University—the first foreign dean of a political science faculty in mainland China's history. In *The Dean of Shandong*, Bell chronicles his experiences as what he calls "a minor bureaucrat," offering an inside account of the workings of Chinese academia and what they reveal about China's political system. It wasn't all smooth sailing—Bell wryly recounts sporadic bungles and misunderstandings—but Bell's post as dean provides a unique vantage point on China today.

Bell, neither a Chinese citizen nor a member of the Chinese Communist Party, was appointed as dean because of his scholarly work on Confucianism—but soon found himself coping with a variety of issues having little to do with scholarship or Confucius. These include the importance of hair color and the prevalence of hair-dyeing among university administrators, both male and female; Shandong's drinking culture, with endless toasts at every shared meal; and some unintended consequences of an intensely competitive academic meritocracy. As dean, he also confronts weightier matters: the role at the university of the Party secretary, the national anticorruption campaign and its effect on academia (Bell asks provocatively, "What's wrong with corruption?"), and formal and informal modes of censorship. Considering both the revival of Confucianism in China over the last three decades and what he calls "the Communist comeback" since 2008, Bell predicts that China's political future is likely to be determined by both Confucianism and Communism.

The Decline and Rise of Democracy

David Stasavage 9780691228976 £25.00 • \$31.00 Trade Paperback Political Science / Political Ideologies / Democracy August 2021 Princeton University Press

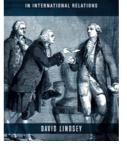

"One of the most important books on political regimes written in a generation."—Steven Levitsky, *New York Times*—bestselling author of *How Democracies Die*

A new understanding of how and why early democracy took hold, how modern democracy evolved, and what this history teaches us about the future

Historical accounts of democracy's rise tend to focus on ancient Greece and pre-Renaissance Europe. *The Decline and Rise of Democracy* draws from global evidence to show that the story is much richer—democratic practices were present in many places, at many other times, from the Americas before European conquest, to ancient Mesopotamia, to precolonial Africa. Delving into the prevalence of early democracy throughout the world, David Stasavage makes the case that understanding how and where these democracies flourished—and when and why they declined—can provide crucial information not just about the history of governance, but also about the ways modern democracies work and where they could manifest in the future.

Drawing from examples spanning several millennia, Stasavage first considers why states developed either democratic or autocratic styles of governance and argues that early democracy tended to develop in small places with a weak state and, counterintuitively, simple technologies. When central state institutions (such as a tax bureaucracy) were absent—as in medieval Europe—rulers needed consent from their populace to govern. When central institutions were strong—as in China or the Middle East consent was less necessary and autocracy more likely. He then explores the transition from early to modern democracy, which first took shape in England and then the United States, illustrating that modern democracy arose as an effort to combine popular control with a strong state over a large territory. Democracy has been an experiment that has unfolded over time and across the world—and its transformation is ongoing.

DELEGATED DIPLOMACY

Delegated Diplomacy

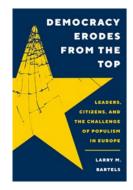

David Lindsey 9780231209335 £30.00 • \$35.00 Trade Paperback Political Science / International Relations / Diplomacy March 2023 Columbia University Press

Why do states still need diplomats? Despite instantaneous electronic communication and rapid global travel, the importance of ambassadors and embassies has in many ways grown since the middle of the nineteenth century. However, in theories of international relations, diplomats are often neglected in favor of states or leaders, or they are dismissed as old-fashioned.

David Lindsey develops a new theory of diplomacy that illuminates why states find ambassadors indispensable to effective intergovernmental interaction. He argues that the primary diplomatic challenge countries face is not simply communication—it is credibility. Diplomats conferent communicate credibly with their host countries even when their superiors cannot because diplomats spend time building the trust that is vital to cooperation. Using a combination of history, game theory, and statistical analysis, Lindsey explores the logic of delegating authority to diplomats. He argues that countries tend to appoint diplomats who are sympathetic to their host countries of their home country and their host country, and they are capable of balancing both sets of interests without embracing either point of view fully.

Delegated Diplomacy is based on a comprehensive dataset of more than 1,300 diplomatic biographies drawn from declassified intelligence records, as well as detailed case studies of the U.S. ambassadors to the United Kingdom and Germany before and during World War I. It provides a rich and insightful account of the theory and practice of diplomacy in international relations.

Democracy Erodes from

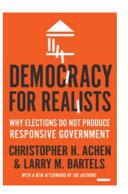

the Top Larry M. Bartels 9780691244501 £25.00 • \$29.95 Hardcover Political Science / Political Ideologies / Democracy April 2023 Princeton University Press

Why leaders, not citizens, are the driving force in Europe's crisis of democracy

A seeming explosion of support for right-wing populist parties has triggered widespread fears that liberal democracy is facing its worst crisis since the 1930s. *Democracy Erodes from the Top* reveals that the real crisis stems not from an increasingly populist public but from political leaders who exploit or mismanage the chronic vulnerabilities of democracy.

In this provocative book, Larry Bartels dismantles the pervasive myth of a populist wave in contemporary European public opinion. While there has always been a substantial reservoir of populist sentiment, Europeans are no less trusting of their politicians and parliaments than they were two decades ago, no less enthusiastic about European integration, and no less satisfied with the workings of democracy. Anti-immigrant sentiment has waned. Electoral support for right-wing populist parties has increased only modestly, reflecting the idiosyncratic successes of populist entrepreneurs, the failures of mainstream parties, and media hype. Europe's most sobering examples of democratic backsliding—in Hungary and Poland—occurred not because voters wanted authoritarianism but because conventional conservative parties, once elected, seized opportunities to entrench themselves in power.

By demonstrating the inadequacy of conventional bottom-up interpretations of Europe's political crisis, *Democracy Erodes from the Top* turns our understanding of democratic politics upside down.

Democracy for Realists

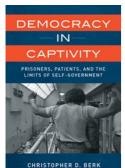

Christopher H. Achen 9780691178240 £20.00 • \$23.95 Trade Paperback Political Science / Political Ideologies / Democracy August 2017 Princeton University Press

Why our belief in government by the people is unrealistic-and what we can do about it

Democracy for Realists assails the romantic folk-theory at the heart of contemporary thinking about democratic politics and government, and offers a provocative alternative view grounded in the actual human nature of democratic citizens.

Christopher Achen and Larry Bartels deploy a wealth of social-scientific evidence, including ingenious original analyses of topics ranging from abortion politics and budget deficits to the Great Depression and shark attacks, to show that the familiar ideal of thoughtful citizens steering the ship of state from the voting booth is fundamentally misguided. They demonstrate that voters—even those who are well informed and politically engaged—mostly choose parties and candidates on the basis of social identities and partisan loyalties, not political issues. They also show that voters adjust their policy views and even their perceptions of basic matters of fact to match those loyalties. When parties are roughly evenly matched, elections often turn on irrelevant or misleading considerations such as economic spurts or downturns beyond the incumbents' control; the outcomes are essentially random. Thus, voters do not control the course of public policy, even indirectly.

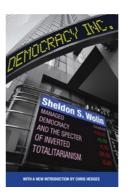

Achen and Bartels argue that democratic theory needs to be founded on identity groups and political parties, not on the preferences of individual voters. Now with new analysis of the 2016 elections, *Democracy for Realists* provides a powerful challenge to conventional thinking, pointing the way toward a fundamentally different understanding of the realities and potential of democratic government.

Democracy in Captivity

Christopher D. Berk 9780520394940 £30.00 • \$34.95 Trade Paperback Political Science / Political Ideologies / Democracy August 2023 University of California Press

Who ought to govern those held in custody, and by what right? *Democracy in Captivity* examines various efforts to answer these questions, centering on two case studies at custodial institutions: the rise and demise of patient self-governance at St. Elizabeths Hospital in Washington, DC, between 1947 and 1965 and the prisoner-organized governance of Massachusetts's Walpole State Prison following a 1973 prison-guard strike. As Christopher D. Berk shows, the promise of these initiatives was tempered by the custodians' backlash to their wards' attempts at self-rule. This backlash arrived not only in the blunt forms of restraint chairs, riot gear, and a surgeon's scalpel but also as more covert measures taken under the cover of so-called democratic management—which in turn entrenched disenfranchisement and naturalized authoritarian rule. Turning from these case studies to a wider consideration of custody and democracy. Berk explores pathologies that have captured the politics of punishment, with pressing implications for the practice of democracy both inside and outside custodial institutions.

Democracy Incorporated

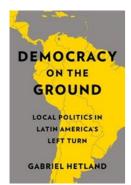

Sheldon S. Wolin 9780691178486 £18.99 • \$22.95 Trade Paperback Political Science / American Government August 2017 Princeton University Press

Democracy is struggling in America--by now this statement is almost cliché. But what if the country is no longer a democracy at all? In *Democracy Incorporated*, Sheldon Wolin considers the unthinkable: has America unwittingly morphed into a new and strange kind of political hybrid, one where economic and state powers are conjoined and virtually unbridled? Can the nation check its descent into what the author terms "inverted totalitarianism"?

Wolin portrays a country where citizens are politically uninterested and submissive---and where elites are eager to keep them that way. At best the nation has become a "managed democracy" where the public is shepherded, not sovereign. At worst it is a place where corporate power no longer answers to state controls. Wolin makes clear that today's America is in no way morally or politically comparable to totalitarian states like Nazi Germany, yet he warns that unchecked economic power risks verging on total power and has its own unnerving pathologies. Wolin examines the myths and mythmaking that justify today's politics, the quest for an ever-expanding economy, and the perverse attractions of an endless war on terror. He argues passionately that democracy's best hope lies in citizens themselves learning anew to exercise power at the local level.

Democracy Incorporated is one of the most worrying diagnoses of America's political ills to emerge in decades. It is sure to be a lightning rod for political debate for years to come. Now with a new introduction by Pulitzer Prize-winning journalist Chris Hedges, Democracy Incorporated remains an essential work for understanding the state of democracy in America.

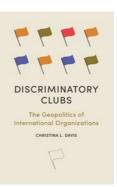

Democracy on the Ground

Gabriel Hetland 9780231207713 £30.00 • \$35.00 Trade Paperback Political Science / World / Caribbean & Latin American July 2023 Columbia University Press

Is democracy possible only when it is safe for elites? Latin American history seems to suggest so. Right-wing forces have repeatedly deposed elected governments that challenged the rich and accepted democracy only after the defanging of the Left and widespread market reform. Latin America's recent "left turn" raised the question anew: how would the Right react if democracy threatened elite interests?

This book examines the complex relationship of the Left, the Right, and democracy through the lens of local politics in Venezuela and Bolivia. Drawing on two years of fieldwork, Gabriel Hetland compares attempts at participatory reform in cities governed by the Left and Right in each country. He finds that such measures were more successful in Venezuela than Bolivia regardless of which type of party held office, though existing research suggests that deepening democracy is much more likely under a left party. Hetland accounts for these findings by arguing that Venezuela's ruling party achieved hegemony —presenting its ideas as the ideas of all—while Bolivia's ruling party did not. The Venezuelan Right was compelled to act on the Left's political terrain; this pushed it to implement participatory reform in an unexpectedly robust way. In Bolivia, demobilization of popular movements led to an inhospitable environment for local democratic deepening under any party.

Democracy on the Ground shows that, just as right-wing hegemony can reshape the Left, leftist hegemony can reshape the Right. Offering new perspectives on participation, populism, and Latin American politics, this book challenges widespread ideas about the constraints on democracy.

Discriminatory Clubs

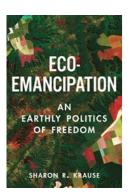

Christina L. Davis 9780691247786 £32.00 • \$38.00 Trade Paperback Political Science / Geopolitics July 2023 Princeton University Press

The discriminatory logic at the heart of multilateralism

Member selection is one of the defining elements of social organization, imposing categories on who we are and what we do. *Discriminatory Clubs* shows how international organizations are like social clubs, ones in which institutional rules and informal practices enable states to favor friends while excluding rivals.

Where race or socioeconomic status may be a basis for discrimination by social clubs, geopolitical alignment determines who gets into the room to make the rules of global governance. Christina Davis brings together a wealth of data on membership provisions for more than three hundred organizations to reveal the prevalence of club-style selection on the world stage. States join organizations to deepen their association with a particular group of states—most often their allies—and for the gains from policy coordination. Even organizations that claim to be universal, to target narrow issues, or to cover geographic regions use club-style admission criteria. Davis demonstrates that when it comes to the most important decision of cooperation—who belongs to the club and who doesn t—geopolitical alignment can matter more than the merits or policies of potential members.

With illuminating case studies ranging from nineteenth-century Japan to contemporary Palestine and Taiwan, *Discriminatory Clubs* sheds light on how, for global and regional organizations such as the WTO and the EU, alliance ties and shared foreign-policy positions form the basis of cooperation.

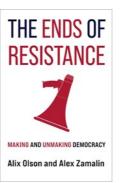

Eco-Emancipation

Sharon R. Krause 9780691242255 £30.00 • \$35.00 Hardcover Political Science / Public Policy / Environmental Policy May 2023 Princeton University Press

The case for an eco-emancipatory politics to release the Earth from human domination and free us all from lives that are both exploitative and exploited

Human domination of nature shapes every aspect of our lives today, even as it remains virtually invisible to us. Because human beings are a part of nature, the human domination of nature circles back to confine and exploit people as well—and not only the poor and marginalized but also the privileged and affluent, even in the world's most prosperous societies. Although modern democracy establishes constraints intended to protect people from domination as the arbitrary exercise of power, it offers few such protections for nohuman parts of nature. The result is that, wherever we fall in human hierarchies, we inevitably find ourselves both complicit in and entrapped by a system that makes sustainable living all but impossible. It confines and exploits not only nature but people too, albeit in different ways. In *Eco-Emancipation*, Sharon Krause argues that we can find our way to a better, freer life by constraining the use of human power in relation to nature and promoting nature's well-being alongside our own, thereby releasing the Earth from human domination and freing us from away of life that is both exploited communities that incorporate nonhuman parts of nature through institutions of representation and regimes of rights, combining these new institutional arrangements with political activism, a public ethos of respect for nature, and a culture of eco-

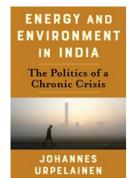

The Ends of Resistance

Alix Olson 9780231204996 £20.00 • \$24.00 Trade Paperback Political Science / History & Theory January 2024 Columbia University Press

Since the rise of Donald Trump and other right-wing authoritarians worldwide, we have been told to "resist." But this kind of opposition looks surprisingly like restoring the status quo. Under the banner of resistance, liberals and progressives have encouraged voting for Democrats, reading the mainstream media, trusting the science, putting up yard signs, buying the right products, and celebrating a "return to normal." How was "resistance" diluted, and where can we find alternative forms of resistance for present and future struggles?

Alix Olson and Alex Zamalin offer a clear-eyed critical account of how neoliberalism has redefined resistance to thwart social movements and consolidate power. Elites have domesticated and coopted some once-radical concepts and practices into "restorative resistance" that bolsters support for an unjust social order while marginalizing, racializing, and criminalizing many others. Olson and Zamalin argue that true resistance to racial neoliberalism must instead be deeply antirestorative: collective, horizontal, counterhegemonic, radically democratic insurrectionary movements that cannot be redirected into shoring up the existing order. This "unruly world-building"–exemplified by Occupy Wall Street, the Movement for Black Lives, Indigenous activism at Standing Rock, and more—pushes us to live, think, and dream beyond profit maximization, democratic civility, and individual freedom. Powerfully and accessibly written with manifesto–like urgency, *The Ends of Resistance* shows how marginalized voices and social movements deepen our thinking for confronting power.

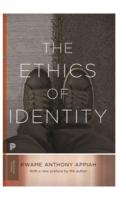

Energy and Environment in India

Johannes Urpelainen 9780231194815 £25.00 • \$30.00 Trade Paperback Political Science / Public Policy / Environmental Policy July 2023 Columbia University Press

India is driving some of the most important trends in global energy markets—with vast environmental implications. As the country grows wealthier, Indians are buying more cars, air conditioners, plane tickets, and other goods that increase demand for fossil fuels. At the same time, the country still faces widespread poverty, and it struggles to address persistent environmental and energy-sector problems, from frequent power outages to a significant number of deaths linked to air pollution.

Johannes Urpelainen provides an expert guide to India's energy and environmental issues that incorporates both domestic and global perspectives. He details how unequal economic development and rapid population growth have brought the country to its current state: a potential engine of the world economy hampered by environmental hazards and energy poverty. Urpelainen argues that institutional shortcomings have led wealthier Indians to find private solutions that protect them from threats such as air pollution and heat waves, but exclude the poor. The retreat of the rich limits the state's ability to regulate the energy sector or address environmental degradation. Urpelainen examines India's most severe environmental crises, considering how climate disruptions are affecting the country's present and future. He analyzes India's role in global environmental politics and assesses the prospects of achieving a more sustainable society. Useful and accessible, this book also offers pragmatic solutions to help overcome the constraints on effective energy and environmental policy.

The Ethics of Identity

Kwame Anthony Appiah 9780691254074 £16.99 • \$19.95 Trade Paperback Philosophy / Political October 2023 Princeton University Press

A bold vision of liberal humanism for navigating today's complex world of growing identity politics and rising nationalism

Collective identities such as race, nationality, religion, gender, and sexuality clamor for recognition and respect, sometimes at the expense of other things we value. To what extent do they constrain our freedom, and to what extent do they enable our individuality? Is diversity of value in itself? Has the rhetoric of human rights been overstretched? Kwame Anthony Appiah draws on thinkers through the ages and across the globe to explore such questions, developing an account of ethics that connects moral obligations with collective allegiances and that takes aim at clichés and received ideas about identity. This classic book takes seriously both the claims of individuality—the task of making a life— and the claims of identity, these large and often abstract social categories through which we define ourselves.

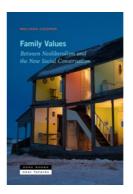

Expert Political Judgment

Philip E. Tetlock 9780691175973 £20.00 • \$24.95 Trade Paperback Political Science August 2017 Princeton University Press

Since its original publication, *Expert Political Judgment* by *New York Times* bestselling author Philip Tetlock has established itself as a contemporary classic in the literature on evaluating expert opinion.

Tetlock first discusses arguments about whether the world is too complex for people to find the tools to understand political phenomena, let alone predict the future. He evaluates predictions from experts in different fields, comparing them to predictions by well-informed laity or those based on simple extrapolation from current trends. He goes on to analyze which styles of thinking are more successful in forecasting. Classifying thinking styles using Isaiah Berlin's prototypes of the fox and the hedgehog, Tetlock contends that the fox--the thinker who knows many little things, draws from an eclectic array of traditions, and is better able to improvise in response to changing events--is more successful in predicting the future than the hedgehog, who knows one big thing, toils devotedly within one tradition, and imposes formulaic solutions on ill-defined problems. He notes a perversely inverse relationship between the best scientific indicators of good judgement and the qualities that the media most prizes in pundits--the single-minded determination required to prevail in ideological combat.

Clearly written and impeccably researched, the book fills a huge void in the literature on evaluating expert opinion. It will appeal across many academic disciplines as well as to corporations seeking to develop standards for judging expert decision-making. Now with a new preface in which Tetlock discusses the latest research in the field, the book explores what constitutes good judgment in predicting future events and looks at why experts are often wrong in their forecasts.

Family Values

Melinda Cooper 9781935408345 £16.99 • \$19.95 Trade Paperback Political Science / Political Ideologies / Conservatism & Liberalism March 2019 Zone Books

Why was the discourse of family values so pivotal to the conservative and free-market revolution of the 1980s and why has it continued to exert such a profound influence on American political life? Why have free-market neoliberals so often made common cause with social conservatives on the question of family, despite their differences on all other issues?

In this book, Melinda Cooper challenges the idea that neoliberalism privileges atomized individualism over familial solidarities, and contractual freedom over inherited status. Delving into the history of the American poor laws, she shows how the liberal ethos of personal responsibility was always undergirded by a wider imperative of family responsibility and how this investment in kinship obligations recurrently facilitated the working relationship between free-market liberals and social conservatives.

Neoliberalism, she argues, must be understood as an effort to revive and extend the poor law tradition in the contemporary idiom of household debt. As neoliberal policymakers imposed cuts to health, education, and welfare budgets, they simultaneously identified the family as a wholesale alternative to the twentieth-century welfare state. And as the responsibility for deficit spending shifted from the state to the household, the private debt obligations of family were defined as foundational to socio-economic order. Despite their differences, neoliberals and social conservatives were in agreement that the bonds of family needed to be encouraged — and at the limit enforced — as a necessary counterpart to market freedom.

In a series of case studies ranging from Clinton's welfare reform to the AIDS epidemic, and from samesex marriage to the student loan crisis, Cooper explores the key policy contributions made by neoliberal economists and legal theorists. Only by restoring the question of family to its central place in the neoliberal project, she argues, can we make sense of the defining political alliance of our times, that between free-market economics and social conservatism.

Fixing the Climate

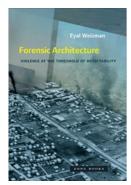

Charles F. Sabel 9780691224558 £20.00 • \$24.95 Hardcover Political Science / Public Policy / Environmental Policy August 2022 Princeton University Press

Solving the global climate crisis through local partnerships and experimentation

Global climate diplomacy—from the Kyoto Protocol to the Paris Agreement—is not working. Despite decades of sustained negotiations by world leaders, the climate crisis continues to worsen. The solution is within our grasp—but we will not achieve it through top-down global treaties or grand bargains among nations.

Charles Sabel and David Victor explain why the profound transformations needed for deep cuts in emissions must arise locally, with government and business working together to experiment with new technologies, quickly learn the best solutions, and spread that information globally. Sabel and Victor show how some of the most iconic successes in environmental policy were products of this experimentalist approach to problem solving, such as the Montreal Protocol on the ozone layer, the rise of electric vehicles, and Europe's success in controlling water pollution. They argue that the Paris Agreement is at best an umbrella under which local experimentation can push the technological frontier and help societies around the world learn how to deploy the technologies and policies needed to tackle this daunting global problem.

A visionary book that fundamentally reorients our thinking about the climate crisis, *Fixing the Climate* is a road map to institutional design that can finally lead to self-sustaining reductions in emissions that years of global diplomacy have failed to deliver.

Forensic Architecture

Eyal Weizman 9781935408871 £32.00 • \$38.00 Trade Paperback Law / Forensic Science October 2019 Zone Books

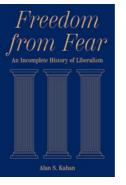

In recent years, a little-known research group named Forensic Architecture began using novel research methods to undertake a series of investigations into human rights abuses. Today, the group provides crucial evidence for international courts and works with a wide range of activist groups, NGOs, Amnesty International, and the UN.

Beyond shedding new light on human rights violations and state crimes across the globe, Forensic Architecture has also created a new form of investigative practice that bears its name. The group uses architecture as an optical device to investigate armed conflicts and environmental destruction, as well as to cross-reference a variety of evidence sources, such as new media, remote sensing, material analysis, witness testimony, and crowd-sourcing.

In *Forensic Architecture*, Eyal Weizman, the group's founder, provides, for the first time, an in-depth introduction to the history, practice, assumptions, potentials, and double binds of this practice. The book includes an extensive array of images, maps, and detailed documentation that records the intricate work the group has performed.

Included in this volume are case studies that traverse multiple scales and durations, ranging from the analysis of the shrapnel fragments in a room struck by drones in Pakistan, the reconstruction of a contested shooting in the West Bank, the architectural recreation of a secret Syrian detention center from the memory of its survivors, a blow-by-blow account of a day-long battle in Gaza, and an investigation of environmental violence and climate change in the Guatemalan highlands and elsewhere.

Weizman's *Forensic Architecture*, stunning and shocking in its critical narrative, powerful images, and daring investigations, presents a new form of public truth, technologically, architecturally, and aesthetically produced. Their practice calls for a transformative politics in which architecture as a field

Freedom from Fear

Alan S. Kahan 9780691191287 £38.00 • \$45.00 Hardcover Political Science / Political Ideologies / Conservatism & Liberalism August 2023 Princeton University Press

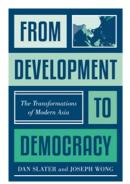

A provocative new history of liberalism that also provides a road map for today's liberals

Freedom from Fear offers a striking new account of the dominant political and social theory of our time: liberalism. In a pathbreaking reframing of the historical debate, Alan Kahan charts the development of Western liberalism from the late eighteenth century to the present. Examining key liberal thinkers and issues, Kahan shows how liberalism is both a response to fear and a source of hope: the search for a world in which no one need be afraid.

Freedom from Fear reveals how liberal arguments typically rely on three pillars: freedom, markets, and morals. But when liberals ignore one or more of these pillars, their arguments generally fail to persuade. Extending from Adam Smith and Montesquieu to today's battles between liberals and populists, the book examines the twists and turns of the "incomplete" or unfinished liberal tradition while demonstrating its fundamental continuity. It combines fresh accounts of familiar figures such as Tocqueville and Rawls with discussions of less-famous but pivotal thinkers such as A. V. Dicey and Jane Addams, and explores how liberals have dealt with crucial issues, from debates over male and female suffrage to colonialism and liberal anti-Catholicism.

By transforming our understanding of the history of liberal thought and practice, *Freedom from Fear* provides a new picture of the political creed today: the paths liberals need to follow, the questions they need to answer, and the dead ends they must avoid—if they are to win.

From Development to Democracy

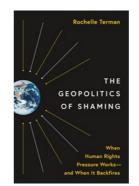

Dan Slater 9780691167602 £30.00 • \$35.00 Hardcover Political Science / Comparative Politics September 2022 Princeton University Press

Why some of Asia's authoritarian regimes have democratized as they have grown richer —and why others haven't

Over the past century, Asia has been transformed by rapid economic growth, industrialization, and urbanization—a spectacular record of development that has turned one of the world's poorest regions into one of its richest. Yet Asia's record of democratization has been much more uneven, despite the global correlation between development and democracy. Why have some Asian countries become more democratic as they have grown richer, while others—most notably China—haven't? In *From Development to Democracy*, Dan Slater and Joseph Wong offer a sweeping and original answer to this crucial question.

Slater and Wong demonstrate that Asia defies the conventional expectation that authoritarian regimes concede democratization only as a last resort, during times of weakness. Instead, Asian dictators have pursued democratic reforms as a proactive strategy to revitalize their power from a position of strength. Of central importance is whether authoritarians are confident of victory and stability. In Japan, South Korea, and Taiwan these factors fostered democracy through strength, while democratic experiments in Indonesia, Thailand, and Myanmar were less successful and more reversible. At the same time, resistance to democratic reforms has proven intractable in Singapore, Malaysia, Hong Kong, China, Vietnam, and Cambodia. Reconsidering China's 1989 crackdown, Slater and Wong argue that it was the action of a regime too weak to concede, not too strong to fail, and they explain why China can allow democracy without inviting instability.

The result is a comprehensive regional history that offers important new insights about when and how democratic transitions happen—and what the future of Asia might be.

The Geopolitics of Shaming

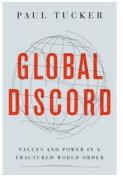

Rochelle Terman 9780691250489 £25.00 • \$29.95 Trade Paperback Political Science / Human Rights October 2023 Princeton University Press

A bold new perspective on the strategic logic of international human rights enforcement

When a government violates the rights of its citizens, the international community can respond by exerting moral pressure and urging reform. Yet many of the most egregious violations appear to go unpunished. In many cases, shaming not only fails to induce compliance but also incites a backlash, provoking resistance and worsening human rights practices. *The Geopolitics of Shaming* presents a new theory on the strategic logic of international human rights enforcement, revealing why and how states punish violations in other countries, when shaming leads to an improvement in human rights conditions, and when it backfires.

Drawing on a wide range of evidence—from large-scale cross-national data to original survey experiments and detailed case studies—Rochelle Terman shows how human rights shaming is a deeply political process, one that operates in and through strategic relationships. Arguing that preexisting geopolitical relationships condition both the causes and consequences of shaming in world politics, she shows how adversaries are quick to condemn human rights abuses but often provoke a counterproductive response, while friends and allies are the most effective shamers but can be reluctant to impose meaningful sanctions.

Upending conventional wisdom on the role of norms in world affairs, *The Geopolitics of Shaming* demonstrates that politicization is integral to—not a corruption of—the success of the global human rights project.

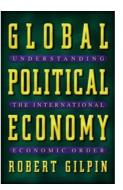

Global Discord

Paul Tucker 9780691229317 £35.00 • \$42.00 Hardcover Political Science / History & Theory November 2022 Princeton University Press

How to sustain an international system of cooperation in the midst of geopolitical struggle

Can the international economic and legal system survive today's fractured geopolitics? Democracies are facing a drawn-out contest with authoritarian states that is entangling much of public policy with global security issues. In *Global Discord*, Paul Tucker lays out principles for a sustainable system of international cooperation, showing how democracies can deal with China and other illiberal states without sacrificing their deepest political values. Drawing on three decades as a central banker and regulator, Tucker applies these principles to the international monetary order, including the role of the U.S. dollar, trade and investment regimes, and the financial system.

Combining history, economics, and political and legal philosophy, Tucker offers a new account of international relations. Rejecting intellectual traditions that go back to Hobbes, Kant, and Grotius, and deploying instead ideas from David Hume, Bernard Williams, and modern mechanism-design economists, Tucker describes a new kind of political realism that emphasizes power and interests without sidelining morality. Incentives must be aligned with values if institutions are to endure. The connecting tissue for a system of international cooperation, he writes, should be legitimacy, creating a world of concentric circles in which we cooperate more with those with whom we share the most and whom we fear the least.

Global Political Economy

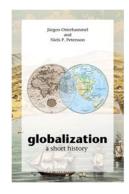

Robert G. Gilpin 9780691086774 £35.00 • \$42.00 Trade Paperback Political Science / International Relations March 2001 Princeton University Press

This book is the eagerly awaited successor to Robert Gilpin's 1987 *The Political Economy of International Relations*, the classic statement of the field of international political economy that continues to command the attention of students, researchers, and policymakers. The world economy and political system have changed dramatically since the 1987 book was published. The end of the Cold War has unleashed new economic and political forces, and new regionalisms have emerged. Computing power is increasingly an impetus to the world economy, and technological developments have changed and are changing almost every aspect of contemporary economic affairs. Gilpin's *Global Political Economy* considers each of these developments. Reflecting a lifetime of scholarship, it offers a masterful survey of the approaches that have been used to understand international economic relations and the problems faced in the new economy.

Gilpin focuses on the powerful economic, political, and technological forces that have transformed the world. He gives particular attention to economic globalization, its real and alleged implications for economic affairs, and the degree to which its nature, extent, and significance have been exaggerated and misunderstood. Moreover, he demonstrates that national policies and domestic economics remain the most critical determinants of economic affairs. The book also stresses the importance of economic regionalism, multinational corporations, and financial upheavals.

Gilpin integrates economic and political analysis in his discussion of "global political economy." He employs the conventional theory of international trade, insights from the theory of industrial organization, and endogenous growth theory. In addition, ideas from political science, history, and other disciplines are employed to enrich understanding of the new international economic order. This wide-ranging book is destined to become a landmark in the field.

Globalization

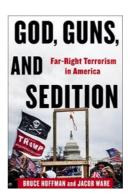

Jürgen Osterhammel 9780691133959 £22.00 • \$27.95 Trade Paperback Political Science / Globalization August 2009 Princeton University Press

"Globalization" has become a popular buzzword for explaining today's world. The expression achieved terminological stardom in the 1990s and was soon embraced by the general public and integrated into numerous languages.

But is this much-discussed phenomenon really an invention of modern times? In this work, Jürgen Osterhammel and Niels Petersson make the case that globalization is not so new, after all. Arguing that the world did not turn "global" overnight, the book traces the emergence of globalization over the past seven or eight centuries. In fact, the authors write, the phenomenon can be traced back to early modern large-scale trading, for example, the silk trade between China and the Mediterranean region, the shipping routes between the Arabian Peninsula and India, and the more frequently traveled caravan routes of the Near East and North Africa--all conduits for people, goods, coins, artwork, and ideas.

Osterhammel and Petersson argue that the period from 1750 to 1880--an era characterized by the development of free trade and the long-distance impact of the industrial revolution--represented an important phase in the globalization phenomenon. Moreover, they demonstrate how globalization in the mid-twentieth century opened up the prospect of global destruction though nuclear war and ecological catastrophe. In the end, the authors write, today's globalization is part of a long-running transformation and has not ushered in a "global age" radically different from anything that came before.

This book will appeal to historians, economists, and anyone in the social sciences who is interested in the historical emergence of globalization.

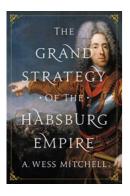

God, Guns, and Sedition

Bruce Hoffman 9780231211222 £25.00 • \$28.95 Hardcover Political Science / Terrorism December 2023 Columbia University Press

Shocking acts of terrorism have erupted from violent American far-right extremists in recent years, including the 2015 mass murder at a historic Black church in Charleston and the January 6, 2021, attack on the U.S. Capitol. These incidents, however, are neither new nor unprecedented. They are the latest flashpoints in a process that has been unfolding for decades, in which wast conspiracy theories and radical ideologies such as white supremacism, racism, antisemitism, xenophobia, and hostility to government converge into a deadly threat to democracy.

God, Guns, and Sedition is the definitive account of the rise of far-right terrorism in the United States —and how to counter it. Leading experts Bruce Hoffman and Jacob Ware trace the historical trajectory and assess the present-day dangers of this violent extremist movement. They combine authoritative, nuanced analysis with gripping storytelling and portraits of the key leaders of the American far right and their followers. Hoffman and Ware highlight developments including the use of cutting-edge communications technology; the embrace of leaderless resistance or lone wolf strategies; the emergence of characteristic tactics and targets; infiltration and recruitment in the military and law enforcement; and the far right's intricate relationship with mainstream politics. An unparalleled examination of one of today's great perils, God, Guns, and Sedition offers practical recommendations to halt the growth of the far right and address the terrorist threat.

The Grand Strategy of the Habsburg Empire

A. Wess Mitchell 9780691196442 £22.00 • \$26.95 Trade Paperback Political Science / Geopolitics October 2019 Princeton University Press

The Habsburg Empire's grand strategy for outmaneuvering and outlasting stronger rivals in a complicated geopolitical world

The Empire of Habsburg Austria faced more enemies than any other European great power. Flanked on four sides by rivals, it possessed few of the advantages that explain successful empires. Yet somehow Austria endured, outlasting Ottoman sieges, Frederick the Great, and Napoleon. A. Wess Mitchell tells the story of how this cash-strapped, polyglot empire survived for centuries in Europe's most dangerous neighborhood without succumbing to the pressures of multisided warfare. He shows how the Habsburgs played the long game in geopolitics, corralling friend and foe alike into voluntarily managing the empire's lengthy frontiers and extending a benign hegemony across the turbulent lands of middle Europe. *The Grand Strategy of the Habsburg Empire* offers lessons on how to navigate a messy geopolitical map, stand firm without the advantage of military predominance, and prevail against multiple rivals.

Hannah Arendt and Isaiah Berlin

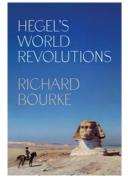

Kei Hiruta 9780691226125 £20.00 • \$24.95 Trade Paperback Philosophy / Political November 2023 Princeton University Press

For the first time, the full story of the conflict between two of the twentieth century's most important thinkers—and the lessons their disagreements continue to offer

Two of the most iconic thinkers of the twentieth century, Hannah Arendt (1906–1975) and Isaiah Berlin (1909–1997) fundamentally disagreed on central issues in politics, history and philosophy. In spite of their overlapping lives and experiences as Jewish émigré intellectuals, Berlin disliked Arendt intensely, saying that she represented "everything that I detest most," while Arendt met Berlin's hostility with indifference and suspicion. Written in a lively style, and filled with drama, tragedy and passion, *Hannah Arendt and Isaiah Berlin* tells, for the first time, the full story of the fraught relationship between these towering figures, and shows how their profoundly different views continue to offer important lessons for political thought today.

Drawing on a wealth of new archival material, Kei Hiruta traces the Arendt–Berlin conflict, from their first meeting in wartime New York through their widening intellectual chasm during the 1950s, the controversy over Arendt's 1963 book *Eichmann in Jerusalem*, their final missed opportunity to engage with each other at a 1967 conference and Berlin's continuing animosity toward Arendt after her death. Hiruta blends political philosophy and intellectual history to examine key issues that simultaneously connected and divided Arendt and Berlin, including the nature of totalitarianism, evil and the Holocaust, human agency and moral responsibility, Zionism, American democray, British imperialism and the Hungarian Revolution. But, most of all, Arendt and Berlin disagreed over a question that goes to the heart of the human condition: what does it mean to be free?

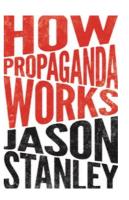

Hegel's World Revolutions

Richard Bourke 9780691250182 £25.00 • \$29.95 Hardcover Political Science / History & Theory October 2023 Princeton University Press

A new account of the relevance of Hegel's ideas for today's world, countering the postwar anti-Hegel "insurgency"

G.W.F. Hegel was widely seen as the greatest philosopher of his age. Ever since, his work has shaped debates about issues as varied as religion, aesthetics and metaphysics. His most lasting contribution was his vision of history and politics. In *Hegel's World Revolutions*, Richard Bourke returns to Hegel's original arguments, clarifying their true import and illuminating their relevance to contemporary society. Bourke shows that central to Hegel's thought was his anatomy of the modern world. On the one hand he claimed that modernity was a deliverance from subjection, but on the other he saw it as having unleashed the spirit of critical reflection. Bourke explores this predicament in terms of a series of world revolutions that Hegel believed had ushered in the rise of civil society and the emergence of the constitutional state.

Bourke interprets Hegel's thought, with particular reference to his philosophy of history, placing it in the context of his own time. He then recounts the reception of Hegel's political ideas, largely over the course of the twentieth century. Countering the postwar revolt against Hegel, Bourke argues that his disparagement by major philosophers has impoverished our approach to history and politics alike. Challenging the condescension of leading thinkers—from Heidegger and Popper to Lévi-Strauss and Foucault—the book revises prevailing views of the relationship between historical ideas and present circumstances.

How Propaganda Works

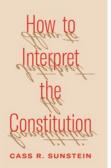

Jason Stanley 9780691173429 £16.99 • \$19.95 Trade Paperback Political Science / Propaganda December 2016 Princeton University Press

How propaganda undermines democracy and why we need to pay attention

Our democracy today is fraught with political campaigns, lobbyists, liberal media, and Fox News commentators, all using language to influence the way we think and reason about public issues. Even so, many of us believe that propaganda and manipulation aren't problems for us—not in the way they were for the totalitarian societies of the mid-twentieth century. In *How Propaganda Works*, Jason Stanley demonstrates that more attention needs to be paid. He examines how propaganda operates subtly, how it undermines democracy—particularly the ideals of democracic deliberation and equality—and how it has damaged democracies of the past.

Focusing on the shortcomings of liberal democratic states, Stanley provides a historically grounded introduction to democratic political theory as a window into the misuse of democratic vocabulary for propaganda's selfish purposes. He lays out historical examples, such as the restructuring of the US public school system at the turn of the twentieth century, to explore how the language of democracy is sometimes used to mask an undemocratic reality. Drawing from a range of sources, including feminist theory, critical race theory, epistemology, formal semantics, educational theory, and social and cognitive psychology, he explains how the manipulative and hypocritical declaration of flawed beliefs and ideologies arises from and perpetuates inequalities in society, such as the racial injustices that commonly occur in the United States.

How Propaganda Works shows that an understanding of propaganda and its mechanisms is essential for the preservation and protection of liberal democracies everywhere.

How to Interpret the Constitution

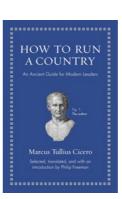

Cass R. Sunstein 9780691252049 £18.99 • \$22.95 Hardcover Political Science / Constitutions August 2023 Princeton University Press

From *New York Times* bestselling author Cass Sunstein, a timely and powerful argument for rethinking how the U.S. Constitution is interpreted

The U.S. Supreme Court has eliminated the right to abortion and is revisiting other fundamental questions today—about voting rights, affirmative action, gun laws, and much more. Once-arcane theories of constitutional interpretation are profoundly affecting the lives of all Americans. In this brief and urgent book, Harvard Law School professor Cass Sunstein provides a lively introduction to competing approaches to interpreting the Constitution—and argues that the only way to choose one is to ask whether it would change American life for the better or worse. If a method of interpretation would eliminate the right of privacy, allow racial segregation, or obliterate free speech, it would be unacceptable for that reason.

But some Supreme Court justices are committed to "originalism," arguing that the meaning of the Constitution is settled by how it was publicly understood when it was ratified. Originalists insist that their approach is dictated by the Constitution. That, Sunstein argues, is a big mistake. The Constitution doesn't contain instructions for its own interpretation. Any approach to constitutional interpretation needs to be defended in terms of its broad effects—what it does to our rights and our institutions. It must respect those rights and institutions—and safeguard the conditions for democracy itself.

Passionate and compelling, *How to Interpret the Constitution* is essential reading for anyone who is concerned about how the Supreme Court is changing the rights and lives of Americans today.

How to Run a Country

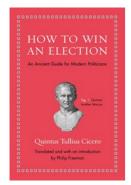

Marcus Tullius Cicero 9780691156576 £13.99 • \$16.95 Hardcover Political Science / Political Process / Leadership January 2013 Princeton University Press

Timeless political wisdom from ancient history's greatest statesman

Marcus Cicero, Rome's greatest statesman and orator, was elected to the Roman Republic's highest office at a time when his beloved country was threatened by power-hungry politicians, dire economic troubles, foreign turmoil, and political parties that refused to work together. Sound familiar? Cicero's letters, speeches, and other writings are filled with timeless wisdom and practical insight about how to solve these and other problems of leadership and politics. How to Run a Country collects the best of these writings to provide an entertaining, common sense guide for modern leaders and citizens. This brief book, a sequel to *How to Win an Election*, gathers Cicero's most perceptive thoughts on topics such as leadership, corruption, the balance of power, taxes, war, immigration, and the importance of rompromise. These writings have influenced great leaders—including America's Founding Fathers—for two thousand years, and they are just as instructive today as when they were first written.

Organized by topic and featuring lively new translations, the book also includes an introduction, headnotes, a glossary, suggestions for further reading, and an appendix containing the original Latin texts. The result is an enlightening introduction to some of the most enduring political wisdom of all time.

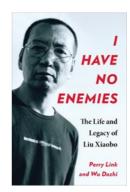

How to Win an Election

Quintus Tullius Cicero 9780691154084 £14.99•\$17.95 Hardcover Political Science / Political Process / Campaigns & Elections February 2012 Princeton University Press

A primer on campaigning in ancient Rome that reads like a strategy memo from a modern political consultant

How to Win an Election is an ancient Roman guide for campaigning that is as up-to-date as tomorrow's headlines. In 64 BC when idealist Marcus Cicero, Rome's greatest orator, ran for consul (the highest office in the Republic), his practical brother Quintus decided he needed some no-nonsense advice on running a successful campaign. What follows in his short letter are timeless bits of political wisdom, from the importance of promising everything to everybody and reminding voters about the sexual scandals of your opponents to being a chameleon, putting on a good show for the masses, and constantly surrounding yourself with rabid supporters. Presented here in a lively and colorful new translation, with the Latin text on facing pages, this unashamedly pragmatic primer on the humble art of personal politicking is dead-on (Cicero won)--and as relevant today as when it was written.

A little-known classic in the spirit of Machiavelli's *Prince, How to Win an Election* is required reading for politicians and everyone who enjoys watching them try to manipulate their way into office.

I Have No Enemies

Perry Link 9780231206341 £30.00 • \$34.95 Hardcover Biography & Autobiography / Political June 2023 Columbia University Press

Late one night in December 2008, police arrived at the home of Liu Xiaobo—China's leading dissident, a key figure in the prodemocracy manifesto Charter 08—and took him away. When Liu won the 2010 Nobel Peace Prize as a political prisoner, the award was bestowed on an empty chair. Inside China, the regime sought to erase every trace of his existence. Liu died of liver cancer in 2017 without ever having been allowed to return home.

I Have No Enemies is the definitive biography of Liu Xiaobo, offering a meticulously researched account of the twists and turns of a remarkable life. Perry Link and Wu Dazhi explore Liu's upbringing, immersion in classical Chinese poetry and philosophy, bold challenges to literary conformity, and involvement in democratic movements. They trace the lifelong evolution of his thinking and chronicle his persecution, incarceration, and death.

I Have No Enemies emphasizes Liu's principled commitment to dissent and the significance of the example he set in China and around the world. Liu was a farsighted strategist whose ultimate goal was "to change a regime by changing a society." In Tiananmen Square, he showed others how to face down armed soldiers; in daily life, he looked for ways to build a more democratic culture. A powerful record of Liu's life and times, this book also tells the story of a generation of Chinese intellectuals who sought a better way forward.

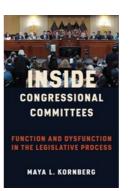

The Impossible State

Wael Hallaq 9780231162579 £28.00 • \$32.00 Trade Paperback Political Science / World / Middle Eastern September 2014 Columbia University Press

Wael B. Hallaq boldly argues that the "Islamic state," judged by any standard definition of what the modern state represents, is both impossible and inherently self-contradictory. Comparing the legal, political, moral, and constitutional histories of premodern Islam and Euro-America, he finds the adoption and practice of the modern state to be highly problematic for modern Muslims. He also critiques more expansively modernity's moral predicament, which renders impossible any project resting solely on ethical foundations.

The modern state not only suffers from serious legal, political, and constitutional issues, Hallaq argues, but also, by its very nature, fashions a subject inconsistent with what it means to be, or to live as, a Muslim. By Islamic standards, the state's technologies of the self are severely lacking in moral substance, and today's Islamic state, as Hallaq shows, has done little to advance an acceptable form of genuine Shari'a governance. The Islamists' constitutional battles in Egypt and Pakistan, the Islamic legal and political failures of the Iranian Revolution, and similar disappointments underscore this fact. Nevertheless, the state remains the favored template of the Islamists and the ulama (Muslim clergymen).

Providing Muslims with a path toward realizing the good life, Hallaq turns to the rich moral resources of Islamic history. Along the way, he proves political and other "crises of Islam" are not unique to the Islamic world nor to the Muslim religion. These crises are integral to the modern condition of both East and West, and by acknowledging these parallels, Muslims can engage more productively with their Western counterparts.

Inside Congressional Committees

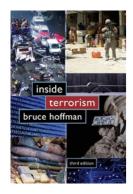

Maya Kornberg 9780231201834 £25.00 • \$30.00 Trade Paperback Political Science / American Government / Legislative Branch February 2023 Columbia University Press

It is widely believed that Congress has broken down. Media accounts present the storied legislature as thoroughly gridlocked, paralyzed by partisan rancor. Political scientists find that Congress is passing fewer laws and spending less time on legislative work. Which parts of a supposedly dysfunctional legislature continue to function?

Maya L. Kornberg examines the legislative process beyond voting patterns, emphasizing the crucial role of congressional committee hearings. In committees, lawmakers hear from expert witnesses, legislators revise and discuss bills before bringing them to a vote, and the public has an opportunity to engage with Congress. Kornberg scrutinizes the inner workings of committees—the different types of witnesses who testify, the varied hearings Congress holds, and the distinct effects that committees work has on congresspeople. She deploys original mixed-methods datasets that span from insider interviews to sentiment analysis examining the language used in hearings. Kornberg evaluates how committees operate and the conditions affecting their performance, finding that committee work can be more deliberative and productive than the politics of the Congress floor.

Through a comprehensive exploration of who committees hear from and how they listen, this book demonstrates that Congress is not as dysfunctional as is often claimed. *Inside Congressional Committees* also suggests timely reforms based on these findings that can strengthen Congress.

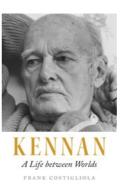

Inside Terrorism

Bruce Hoffman 9780231174770 £22.00 • \$26.95 Trade Paperback Political Science / Terrorism September 2017 Columbia University Press

Bruce Hoffman's *Inside Terrorism* has remained the seminal work for understanding the historical evolution of terrorism and the terrorist mind-set. In this revised third edition of his classic text, Hoffman analyzes the latest developments in global terrorism, offering insight into new adversaries, motivations, strategies, and tactics. He focuses on the rise of ISIS and the resilience of al-Qaeda; terrorist exploitation of the Internet and embrace of social media; radicalization of foreign fighters; and potential future trends, including the repercussions of a post-caliphate ISIS.

Hoffman examines the demographics of contemporary terrorist leaders and recruits; the continued use of suicide bombers; and the likelihood of a chemical, biological, radiological, or nuclear terrorist strike. He also considers the resurgence of violent antigovernment militants, including white supremacists and opponents of abortion. He argues that the war on terrorism did not end with Osama bin Laden's death and that ongoing instability and strife in Syria, Iraq, Afghanistan, Libya, and Yemen, among other places, will both sustain terrorist movements and have broad implications for domestic and international security around the globe.

Kennan

Frank Costigliola 9780691165400 £35.00 • \$39.95 Hardcover Biography & Autobiography / Political January 2023 Princeton University Press

A definitive biography of the U.S. diplomat and prize-winning historian George F. Kennan

The diplomat and historian George F. Kennan (1904–2005) ranks as one of the most important figures in American foreign policy—and one of its most complex. Drawing on many previously untapped sources, Frank Costigliola's authoritative biography offers a new picture of a man of extraordinary ability and ambition whose idea of containing the Soviet Union helped ignite the Cold War but who spent the next half century trying to extinguish it. Always prescient, Kennan in the 1990s warned that the eastward expansion of NATO would spur a new cold war with Russia.

Even as Kennan championed rational realism in foreign policy, his personal and professional lives were marked by turmoil. And though he was widely respected and honored by presidents and the public, he judged his career a failure because he had been dropped as a pilot of U.S. foreign policy. Impossible to classify, Kennan was a sui generis thinker, a trenchant critic of both communism and capitalism, and a pioneering environmentalist. Living between Russia and the United States, he witnessed firsthand Stalin's tightening grip on the Soviet Union, the collapse of Europe during World War II, and the nuclear arms race of the Cold War.

An absorbing portrait of an eloquent, insightful, and sometimes blinkered iconoclast whose ideas are still powerfully relevant, *Kennan* invites us to imagine a world that Kennan fought for but was unable to bring about—one not of confrontations and crises but of dialogue and diplomacy.

JACOB M. GRUMBACH Laboratories

Democracy

How National Parties Transformed State Politic

Laboratories against Democracy

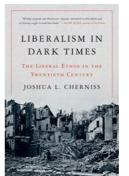

Jacob M. Grumbach 9780691218465 £17.99 • \$21.95 Trade Paperback Political Science / Political Ideologies / Democracy August 2023 Princeton University Press

As national political fights are waged at the state level, democracy itself pays the price

Over the past generation, the Democratic and Republican parties have each become nationally coordinated political teams. American political institutions, on the other hand, remain highly decentralized. *Laboratories against Democracy* shows how national political conflicts are increasingly flowing through the subnational institutions of state politics—with profound consequences for public policy and American democracy.

Jacob Grumbach argues that as Congress has become more gridlocked, national partisan and activist groups have shifted their sights to the state level, nationalizing state politics in the process and transforming state governments into the engines of American policymaking. He shows how this has had the ironic consequence of making policy more varied across the states as red and blue party coalitions implement increasingly distinct agendas in areas like health care, reproductive rights, and climate change. The consequences don't stop there, however. Drawing on a wealth of new data on state policy, public opinion, money in politics, and democratic performance, Grumbach traces how national groups are using state governmental authority to suppress the vote, gerrymander districts, and erode the very foundations of democracy itself.

Required reading for this precarious moment in our politics, *Laboratories against Democracy* reveals how the pursuit of national partisan agendas at the state level has intensified the challenges facing American democracy, and asks whether today's state governments are mitigating the political crises of our time—or accelerating them.

Liberalism in Dark Times

Joshua L. Cherniss 9780691220932 £22.00 • \$27.95 Trade Paperback Philosophy / Political February 2023 Princeton University Press

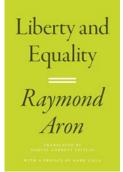

A timely defense of liberalism that draws vital lessons from its greatest midcentury proponents

Today, liberalism faces threats from across the political spectrum. While right-wing populists and leftist purists righteously violate liberal norms, theorists of liberalism seem to have little to say. In *Liberalism in Dark Times*, Joshua Cherniss issues a rousing defense of the liberal tradition, drawing on a neglected strand of liberal thought.

Assaults on liberalism—a political order characterized by limits on political power and respect for individual rights—are nothing new. Early in the twentieth century, democracy was under attack around the world, with one country after another succumbing to dictatorship. While many intellectuals dismissed liberalism as outdated, unrealistic, or unworthy, a handful of writers defended and reinvigorated the liberal ideal, including Max Weber, Raymond Aron, Albert Camus, Reinhold Niebuhr, and Isaiah Berlin—each of whom is given a compelling new assessment here.

Building on the work of these thinkers, Cherniss urges us to imagine liberalism not as a set of policies but as a temperament or disposition—one marked by openness to complexity, willingness to acknowledge uncertainty, tolerance for difference, and resistance to ruthlessness. In the face of rising political fanaticism, he persuasively argues for the continuing importance of this liberal ethos.

Liberty and Equality

Raymond Aron 9780691226767 £16.99 • \$19.95 Hardcover Philosophy / Political November 2023 Princeton University Press REPRESENTATION AND ADDRESS AND ADDR

THE LIMITS OF TOLERANCE

The Limits of Tolerance

Denis Lacorne 9780231187152 £22.00 • \$27.00 Trade Paperback Political Science / History & Theory July 2023 Columbia University Press

An invaluable reflection on the essence of liberal democracy—and an ideal introduction to the work of political philosopher Raymond Aron

Liberty and Equality is the first English translation of the last lecture delivered at the Collège de France by Raymond Aron, one of the most influential political and social thinkers of the twentieth century. In this important work, the most prominent French liberal intellectual of the Cold War era presents his views on the core values of liberal democracy: liberty and equality. At the same time, he provides an ideal introduction to key aspects of his thought.

Ranging from Soviet ideology to Watergate, Aron reflects on root concepts of democracy and representative government, articulates a notion of liberty or freedom as equal right as distinct from equal outcome, and discusses different kinds of liberties: personal, political, religious, and social. In search of a common truth or at least a common good, and analyzing what he perceives as the crisis of liberal democracies, Aron opens a space for reexamining the relation between liberty and equality.

The modern notion of tolerance—the welcoming of diversity as a force for the common good—emerged in the Enlightenment in the wake of centuries of religious wars. First elaborated by philosophers such as John Locke and Voltaire, religious tolerance gradually gained ground in Europe and North America. But with the resurgence of fanaticism and terrorism, religious tolerance is increasingly being challenged by frightened publics.

In this book, Denis Lacorne traces the emergence of the modern notion of religious tolerance in order to rethink how we should respond to its contemporary tensions. In a wide-ranging argument that spans the Ottoman Empire, the Venetian republic, and recent controversies such as France's burga ban and the white-supremacist rally in Charlottesville, *The Limits of Tolerance* probes crucial questions: Should we impose limits on freedom of expression in the name of human dignity or decency? Should we accept religious symbols in the public square? Can we tolerate the intolerant? While acknowledging that tolerance can never be entirely without limits, Lacorne defends the Enlightenment concept against recent attempts to circumscribe it, arguing that without it a pluralistic society cannot survive. Awarded the Prix Montyon by the Académie Française, *The Limits of Tolerance* is a powerful reflection on twenty-first-century democracy's most fundamental challenges.

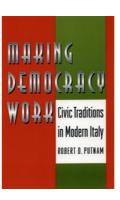

Line of Advantage

Michael Green 9780231204675 £30.00 • \$35.00 Trade Paperback Political Science / World / Asian March 2022 Columbia University Press

No other country has devised a grand strategy for managing China's rising economic and military power as deliberately or successfully as Japan. Seeking to counter Chinese ambitions toward regional hegemony, Japan has taken an increasingly assertive role in East Asia and the world. During the tenure of Prime Minister Abe Shinzo, the country pursued closer security cooperation with the United States and other democracies, established a more centralized national defense system, and advanced rules and norms to preserve the open regional order in the Indo-Pacific that is crucial to its prosperity and survival—all while managing an important economic relationship with China.

In *Line of Advantage*, Michael J. Green provides a groundbreaking and comprehensive account of Japan's strategic thinking under Abe. He explains the foundational logic and the worldview behind this approach, from key precedents in Japanese history to the specific economic, defense, and diplomatic priorities shaping contemporary policy toward China, the United States, the two Koreas, and the Indo-Pacific region. Drawing on two decades of access to Abe and other Japanese political, military, and business leaders, Green provides an insider's perspective on subjects such as how Japan pursued competition with China without losing the benefits of economic cooperation. Assessing the strengths and weaknesses of Japan's new active role, *Line of Advantage* sheds new light on a period with profound implications for the future of U.S. competition with China and international affairs in Asia more broadly.

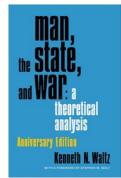

Making Democracy Work

Robert D. Putnam 9780691037387 £35.00 • \$42.00 Trade Paperback Political Science / History & Theory June 1994 Princeton University Press

Why do some democratic governments succeed and others fail? In a book that has received attention from policymakers and civic activists in America and around the world, Robert Putnam and his collaborators offer empirical evidence for the importance of "civic community" in developing successful institutions. Their focus is on a unique experiment begun in 1970 when Italy created new governments for each of its regions. After spending two decades analyzing the efficacy of these governments in such fields as agriculture, housing, and health services, they reveal patterns of associationism, trust, and cooperation that facilitate good governance and economic prosperity.

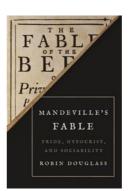

Man, the State, and War

Kenneth Waltz 9780231188050 £22.00 • \$28.00 Trade Paperback Political Science / History & Theory December 2018 Columbia University Press

What are the causes of war? How might the world be made more peaceful? In this landmark work of international relations theory, first published in 1959, the eminent realist scholar Kenneth N. Waltz offers a foundational analysis of the nature of conflict between states. He explores works by both classic political philosophers, such as St. Augustine, Hobbes, Kant, and Rousseau, and modern psychologists and anthropologists to discover ideas intended to explain war among states and related prescriptions for peace. Waltz influentially distinguishes among three "images" of the origins of war: those that blame individual leaders or human nature, those rooted in states' internal composition, and those concerning the structure of the international system. With a foreword by Stephen M. Walt on the legacy and continued relevance of Waltz's work, this anniversary edition brings new life to a perennial international relations classic.

Mandeville's Fable

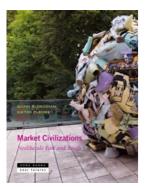

Robin Douglass 9780691219172 £30.00 • \$35.00 Trade Paperback Philosophy / Political May 2023 Princeton University Press

Why we should take Bernard Mandeville seriously as a philosopher

Bernard Mandeville's *The Fable of the Bees* outraged its eighteenth-century audience by proclaiming that private vices lead to public prosperity. Today the work is best known as an early iteration of laissez-faire capitalism. In this book, Robin Douglass looks beyond the notoriety of Mandeville's great work to reclaim its status as one of the most incisive philosophical studies of human nature and the origin of society in the Enlightenment era. Focusing on Mandeville's moral, social, and political ideas, Douglass offers a revelatory account of why we should take Mandeville seriously as a philosopher.

Douglass expertly reconstructs Mandeville's theory of how self-centred individuals, who care for their reputation and social standing above all else, could live peacefully together in large societies. Pride and shame are the principal motives of human behaviour, on this account, with a large dose of hypocrisy and self-deception lying behind our moral practices. In his analysis, Douglass attends closely to the changes between different editions of the *Fable*; considers Mandeville's arguments in light of objections and rival accounts from other eighteenth-century philosophers, including Shaftesbury, Hume, and Smith; and draws on more recent findings from social psychology.

With this detailed and original reassessment of Mandeville's philosophy, Douglass shows how *The Fable of the Bees*—by shining a light on the dark side of human nature—has the power to unsettle readers even today.

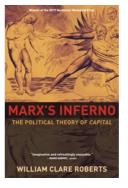

Market Civilizations

Quinn Slobodian 9781942130673 £22.00 • \$28.00 Hardcover Political Science / Political Economy May 2022 Zone Books

A deep investigation of neoliberalism's proselytizers in Eastern Europe and the Global South

Where does free market ideology come from? Recent work on the neoliberal intellectual movement around the Mont Pelerin Society has allowed for closer study of the relationship between ideas, interests, and institutions. Yet even as this literature brought neoliberalism down to earth, it tended to reproduce a European and American perspective on the world. With the notable exception of Augusto Pinochet's Chile, long seen as a laboratory of neoliberalism, the new literature followed a story of diffusion as ideas migrated outward from the Global North. Even in the most innovative work, the cast of characters remains surprisingly limited, clustering around famous intellectuals like Milton Friedman and Friedrich Hayek.

Market Civilizations redresses this absence by introducing a range of characters and voices active in the transnational neoliberal movement from the Global South and Eastern Europe. This includes B. R. Shenoy, an early member of the Mont Pelerin Society from India, who has been canonized in some circles since the Singh reforms; Manuel Ayau, another MPS president and founder of the Marroquín University, an underappreciated Latin American node in the neoliberal network; Chinese intellectuals who read Hayek and Mises through local circumstances; and many others. Seeing neoliberalism from beyond the industrial core helps us understand what made radical capitalism attractive to diverse populations and how often disruptive policy ideas "went local."

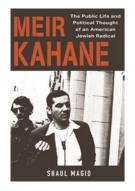

Marx's Inferno

William Clare Roberts 9780691180816 £22.00 • \$27.95 Trade Paperback Philosophy / Political March 2018 Princeton University Press

Marx's Inferno reconstructs the major arguments of Karl Marx's Capital and inaugurates a completely new reading of a seminal classic. Rather than simply a critique of classical political economy, William Roberts argues that Capital was primarily a careful engagement with the motives and aims of the workers' movement. Understood in this light, Capital emerges as a profound work of political theory. Placing Marx against the background of nineteenth-century socialism, Roberts shows how Capital was ingeniously modeled on Dante's Inferno, and how Marx, playing the role of Virgil for the proletariat, introduced partisans of workers' emancipation to the secret depths of the modern "social Hell." In this manner, Marx revised republican ideas of freedom in response to the rise of capitalism.

Combining research on Marx's interlocutors, textual scholarship, and forays into recent debates, Roberts traces the continuities linking Marx's theory of capitalism to the tradition of republican political thought. He immerses the reader in socialist debates about the nature of commerce, the experience of labor, the power of bosses and managers, and the possibilities of political organization. Roberts rescues those debates from the past, and shows how they speak to ever-renewed concerns about political life in today's world.

Meir Kahane

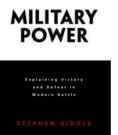

Shaul Magid 9780691254692 £20.00 • \$24.95 Trade Paperback Biography & Autobiography / Political August 2023 Princeton University Press

The life and politics of an American Jewish activist who preached radical and violent means to Jewish survival

Meir Kahane came of age amid the radical politics of the counterculture, becoming a militant voice of protest against Jewish liberalism. Kahane founded the Jewish Defense League in 1968, declaring that Jews must protect themselves by any means necessary. He immigrated to Israel in 1971, where he founded KACH, an ultranationalist and racist political party. He would die by assassination in 1990. Shaul Magid provides an in-depth look at this controversial figure, showing how the postwar American experience shaped his life and political thought.

Magid sheds new light on Kahane's radical political views, his critique of liberalism, and his use of the "grammar of race" as a tool to promote Jewish pride. He discusses Kahane's theory of violence as a mechanism to assure Jewish safety, and traces how his Zionism evolved from a fervent support of Israel to a belief that the Zionist project had failed. Magid examines how tradition and classical Jewish texts profoundly influenced Kahane's thought later in life, and argues that Kahane's enduring legacy lies not in his Israeli career but in the challenge he posed to the liberalism and assimilatory project of the postwar American Jewish establishment.

This incisive book shows how Kahane was a quintessentially American figure, one who adopted the radicalism of the militant Left as a tenet of Jewish survival.

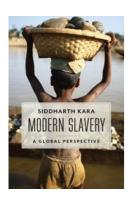

Military Power

Stephen Biddle 9780691128023 £35.00 • \$39.95 Trade Paperback Political Science July 2006 Princeton University Press

In war, do mass and materiel matter most? Will states with the largest, best equipped, informationtechnology-rich militaries invariably win? The prevailing answer today among both scholars and policymakers is yes. But this is to overlook force employment, or the doctrine and tactics by which materiel is actually used. In a landmark reconception of battle and war, this book provides a systematic account of how force employment interacts with materiel to produce real combat outcomes. Stephen Biddle argues that force employment is central to modern war, becoming increasingly important since 1900 as the key to surviving ever more lethal weaponry. Technological change produces opposite effects depending on how forces are employed; to focus only on materiel is thus to risk major error--with serious consequences for both policy and scholarship.

In clear, fluent prose, Biddle provides a systematic account of force employment's role and shows how this account holds up under rigorous, multimethod testing. The results challenge a wide variety of standard views, from current expectations for a revolution in military affairs to mainstream scholarship in international relations and orthodox interpretations of modern military history.

Military Power will have a resounding impact on both scholarship in the field and on policy debates over the future of warfare, the size of the military, and the makeup of the defense budget.

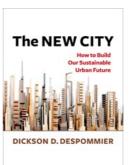

Modern Slavery

Siddharth Kara 9780231158473 £22.00 • \$28.00 Trade Paperback Political Science / Human Rights March 2023 Columbia University Press

Siddharth Kara is a tireless chronicler of the human cost of slavery around the world. He has documented the dark realities of modern slavery in order to reveal the degrading and dehumanizing systems that strip people of their dignity for the sake of profit—and to link the suffering of the enslaved to the day-to-day lives of consumers in the West. In *Modern Slavery*, Kara draws on his many years of expertise to demonstrate the astonishing scope of slavery and offer a concrete path toward its abolition.

From labor trafficking in the U.S. agricultural sector to sex trafficking in Nigeria to debt bondage in the Southeast Asian construction sector to forced labor in the Thai seafood industry, Kara depicts the myriad faces and forms of slavery, providing a comprehensive grounding in the realities of modern-day servitude. Drawing on sixteen years of field research in more than fifty countries around the globe —including revelatory interviews with both the enslaved and their oppressors—Kara sets out the key manifestations of modern slavery and how it is embedded in global supply chains. Slavery offers immense profits at minimal risk through the exploitation of vulnerable subclasses whose brutalization is tacitly accepted by the current global economic order. Kara has developed a business and economic analysis of slavery based on metrics and data that attest to the enormous scale and functioning of these systems of exploitation. Beyond this data-driven approach, *Modern Slavery* unflinchingly portrays the torments endured by the powerless. This searing exposé documents one of humanity's greatest wrongs and lays out the framework for a comprehensive plan to eradicate it.

The New City Dickson Despommier 9780231205504 £34.00 • \$39.95 Hardcover

Political Science / Public Policy / City Planning & Urban Development September 2023 Columbia University Press

Cities are at once among humanity's crowning achievements and core drivers of the climate crisis. Their dependence on the outside world for vital resources is causing global temperatures to rise and wildlife habitats to shrink. But we have the opportunity to make cities more sustainable by transformine the built environment.

Dickson D. Despommier proposes a visionary yet achievable plan for creating a new, self-sustaining urban landscape. He argues that we can find solutions through the concept of biominicry: emulating successful strategies found in nature. A better city is possible if we heed the lessons that forests and trees teach about how to store carbon, grow food, collect rainwater, and convert sunlight into energy. Touring established and leading-edge technologies, *The New City* provides a blueprint for tomorrow's urban environment. Cities built from wood will be more resilient and less destructive than concrete and steel construction; they will also encourage reforestation, boosting carbon sequestration. Vertical farms inside city limits will supply residents with a reliable, healthy food supply. Buildings will harvest moisture from the rain and air to secure a clean water supply. Renewable energy, including not only wind, solar, and geothermal but also clear photovoltaic window glass and nonpolluting hydrogen fuel cells, will power a cleaner city.

The New City delivers both a passionate call to action for halting climate change and a bold vision of the sustainable future within our grasp.

The New Crusades

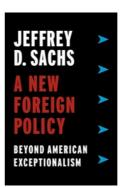

Khaled A. Beydoun 9780520356306 £23.00 • \$26.95 Hardcover Political Science / World March 2023 University of California Press

"The New Crusades is an intersectional milestone. It lucidly illustrates how converging systems of subordination, power, and violence related to Islamophobia are experienced across the globe."—Kimberlé Crenshaw, from the foreword

The first book to examine global Islamophobia from a legal and ground-up perspective, from renowned public intellectual Khaled A. Beydoun.

Islamophobia has spiraled into a global menace, and democratic and authoritarian regimes alike have deployed it as a strategy to persecute their Muslim populations. With this book, Khaled A. Beydoun details how the American War on Terror has facilitated and intensified the network of anti-Muslim campaigns unfolding across the world. *The New Crusades* is the first book of its kind, offering a critical and intimate examination of global Islamophobia and its manifestations in Europe, Asia, the Middle East, and regions beyond and in between.

Through trenchant analysis and direct testimony from Muslims on the ground, Beydoun interrogates how Islamophobia acts as a unifying global thread of state and social bigotry, instigating both liberal and right-wing hate-mongering. Whether imposed by way of hijab bans in France, state-sponsored hate speech and violence in India, or the network of concentration camps in China, Islamophobia unravels into distinct systems of demonization and oppression across the post-9/11 geopolitical landscape. Lucid and poignant, *The New Crusades* reveals that Islamophobia is not only a worldwide phenomenon—it stands as one of the world's last bastions of acceptable hate.

A New Foreign Policy

Jeffrey D. Sachs 9780231188494 £10.99 • \$12.95 Trade Paperback Political Science / International Relations / Diplomacy March 2020 Columbia University Press

The American Century began in 1941 and ended on January 20, 2017. While the United States remains a military giant and is still an economic powerhouse, it no longer dominates the world economy or geopolitics as it once did. The current turn toward nationalism and "America first" unilateralism in foreign policy will not make America great. Instead, it represents the abdication of our responsibilities in the face of severe environmental threats, political upheaval, mass migration, and other global challenges.

In this incisive and forceful book, Jeffrey D. Sachs provides the blueprint for a new foreign policy that embraces global cooperation, international law, and aspirations for worldwide prosperity—not nationalism and gauzy dreams of past glory. He argues that America's approach to the world must shift from military might and wars of choice to a commitment to shared objectives of sustainable development. Our pursuit of primacy has embroiled us in unwise and unwinnable wars, and it is time to shift from making war to making peace and time to embrace the opportunities that international cooperation offers. A New Foreign Policy explores both the danger of the "America first" mindset and the possibilities for a new way forward, proposing timely and achievable plans to foster global economic growth, reconfigure the United Nations for the twenty-first century, and build a multipolar world that is prosperous, peaceful, fair, and resilient.

No Politics but Class Politics

Jr., Adolph Reed, 9781912475575 £20.00 • \$25.00 Trade Paperback Political Science / History & Theory May 2023 Eris

Denouncing racism and celebrating diversity have become central to progressive politics. For many on the left, it seems, social justice would consist of an equitable distribution of wealth, power and esteem among racial groups. But as Adolph Reed Jr. and Walter Benn Michaels argue in this incisive collection of essays, the emphasis here is tragically misplaced. Not only can a fixation with racial disparities distract from the pervasive influence of class, it can actually end up legitimising economic inequality. As Reed and Michaels put it, "racism is real and anti-racism is both admirable and necessary, but extant racism isn't what principally produces our inequality and anti-racism won't eliminate it".

No Politics but Class Politics gathers together Reed and Michaels's recent essays on inequality, along with a newly commissioned interview with the authors and an illuminating foreword by Daniel Zamora and Anton Jäger. These writings eschew the sloppy thinking and moral posturing that too often characterise discussions of race and class in favour of clear-eyed social, cultural and historical analysis. Reed and Michaels make the case here for a genuinely radical politics: a politics which aspires not to the establishment of a demographically representative social elite, but instead to economic justice for everyone.

Of Rule and Office

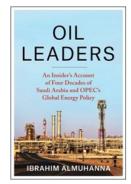

Melissa Lane 9780691192154 £42.00 • \$49.95 Hardcover Philosophy / Political June 2023 Princeton University Press

A constitutionalist reading of Plato's political thought

Plato famously defends the rule of knowledge. Knowledge, for him, is of the good. But what is rule? In this study, Melissa Lane reveals how political office and rule were woven together in Greek vocabulary and practices that both connected and distinguished between rule in general and office as a constitutionally limited kind of rule in particular. In doing so, Lane shows Plato to have been deeply concerned with the roles and relationships between rulers and ruled. Adopting a longstanding Greek expectation that a ruler should serve the good of the ruled, Plato's major political dialogues—the *Republic*, the *Statesman*, and *Laws*—explore how different kinds of rule might best serve that good. With this book, Lane offers the first account of the clearly marked vocabulary of offices at the heart of all three of these dialogues, explaining how such offices fit within the broader organization and theorizing of rule.

Lane argues that taking Plato's interest in rule and office seriously reveals tyranny as ultimately a kind of anarchy, lacking the order as well as the purpose of rule. When we think of tyranny in this way, we see how Plato invokes rule and office as underpinning freedom and friendship as political values, and how Greek slavery shaped Plato's account of freedom. Reading Plato both in the Greek context and in dialogue with contemporary thinkers, Lane argues that rule and office belong at the center of Platonic, Greek, and contemporary political thought.

Oil Leaders

Ibrahim AlMuhanna 9780231189743 £30.00 • \$35.00 Hardcover May 2022 Columbia University Press

Oil is an unusual commodity in that individual decisions can have an outsized effect on the market. OPEC+'s choice to increase production, for instance, might send prices falling, affecting both oil producers and consumers worldwide. What do the leading oil market players consider before making a fateful move?

Oil Leaders offers an unprecedented glimpse into the strategic thinking of top figures in the energy world from the 1980s through the recent past. Ibrahim AlMuhana—a close adviser to four different Saudi oil ministers during that period—examines the role of individual and collective decision making in shaping market movements. He analyzes how powerful individuals made critical choices, tracking how they responded to the flow of information on pivotal market and political events and predicted reactions from allies and adversaries. AlMuhanna highlights how the media has played an increasingly important role as a conduit of information among multiple players in the oil market. Energy leaders have learned to manage the signals they send to the market and to other relevant players in order to avoid sending oil prices into a spiral.

AlMuhanna draws on personal familiarity with many of these individual decision makers as well as his participation in decades of closed-door sessions where crucial choices were made. Featuring revelatory behind-the-scenes perspective on pivotal oil market events and dynamics, this book is a must-read for practitioners and policy makers engaged with the global energy world.

On Niccolò Machiavelli

Gabriele Pedullà 9780231205559 £12.99 • \$14.95 Trade Paperback Philosophy / Political October 2023 Columbia University Press

Five hundred years after his death, Niccolò Machiavelli still draws an astonishing range of contradictory characterizations. Was he a friend of tyrants? An ardent republican loyal to Florence's free institutions? The father of political realism? A revolutionary populist? A calculating rationalist? A Renaissance humanist? A prophet of Italian unification? A theorist of mixed government? A forerunner to authoritarianism? The master of the dark arts of intrigue?

This book provides a vivid and engaging introduction to Machiavelli's life and works that sheds new light on his originality and relevance. Gabriele Pedullà—a leading Italian expert and acclaimed writer-offers fresh readings of the Florentine thinker's most famous writings, *The Prince* and the *Discourses on Livy*, as well as lesser-known texts. A new and often surprising Machiavelli emerges: one closer to his time but also better suited to inform our own. Pedullà's portrait of Machiavelli highlights his close attention to social and emotional bonds, staunch opposition to oligarchy, keen awareness of the economic side of power dynamics, and strong preference for history over philosophy as a guide for leaders.

This book recovers the excitement Machiavelli roused in his first readers for a twenty-first-century audience, capturing his capacity to provoke, both then and now, with unconventional ideas and startling insights.

The Only Woman in the Room

Pnina Lahav 9780691201740 £30.00 • \$35.00 Hardcover Biography & Autobiography / Presidents & Heads Of State September 2022 Princeton University Press

A feminist biography of the only woman to become prime minister of Israel

In this authoritative and empathetic biography, Pnina Lahav reexamines the life of Golda Meir (1898– 1978) through a feminist lens, focusing on her recurring role as a woman standing alone among men. *The Only Woman in the Room* is the first book to contend with Meir's full identity as a woman, Jew, Zionist leader, and one of the founders of Israel, providing a richer portrait of her persona and legacy.

Meir, Lahav shows, deftly deflected misogyny as she traveled the path to becoming Israel's fourth, and only female, prime minister, from 1969 to 1974. Lahav revisits the youthful encounters that forged Meir's passion for socialist Zionism and reasesses her decision to separate from her husband and leave her children in the care of others. Enduring humiliation and derision from her colleagues, Meir nevertheless led in establishing Israel as a welfare state where social security, workers' rights, and maternity leave became law. Lahav looks at the challenges that beset Meir's premiership, particularly the disastrous Yom Kippur War, which led to her resignation and withdrawal from politics, as well as Meir's bitter duel with feminist and civil rights leader Shulamit Aloni, Meir's complex relationship with the Israeli and American feminist movements, and the politics that led her to distance herself from feminism altogether.

Exploring the tensions between Meir's personal and political identities, *The Only Woman in the Room* provides a groundbreaking new account of Meir's life while also illuminating the difficulties all women face as they try to ascend in male-dominated fields.

*Spor Downray... is based on the simple idea that, if government by the people is a goal, the people ought to do the governing." – Nathan Heller, 20: New Keeler

Open Democracy

Reinventing Popular Rule for the Twenty-First Century

Hélène Landemore

Open Democracy

Hélène Landemore 9780691212395 £20.00 • \$23.95 Trade Paperback Philosophy / Political March 2022 Princeton University Press

"*Open Democracy* envisions what true government by mass leadership could look like."—Nathan Heller, *New Yorker* How a new model of democracy that opens up power to ordinary citizens could

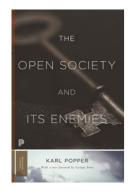

strengthen inclusiveness, responsiveness, and accountability in modern societies

To the ancient Greeks, democracy meant gathering in public and debating laws set by a randomly selected assembly of several hundred citizens. To the Icelandic Vikings, democracy meant meeting every summer in a field to discuss issues until consensus was reached. Our contemporary representative democracies are very different. Modern parliaments are gated and guarded, and it seems as if only certain people—with the right suit, accent, wealth, and connections—are welcome. Diagnosing what is wrong with representative government and aiming to recover some of the lost openness of ancient democracies, *Open Democracy* presents a new paradigm of democracy in which power is genuinely accessible to ordinary citizens.

Hélène Landemore favors the ideal of "representing and being represented in turn" over directdemocracy approaches. Supporting a fresh nonelectoral understanding of democratic representation, Landemore recommends centering political institutions around the "open mini-public"—a large, jurylike body of randomly selected citizens gathered to define laws and policies for the polity, in connection with the larger public. She also defends five institutional principles as the foundations of an open democracy: participatory rights, deliberation, the majoritarian principle, democratic representation, and transparency.

Open Democracy demonstrates that placing ordinary citizens, rather than elites, at the heart of democratic power is not only the true meaning of a government of, by, and for the people, but also feasible and, today more than ever, urgently needed.

The Open Society and Its

Enemies Karl R. Popper 9780691210841 £25.00 • \$29.95 Trade Paperback Philosophy / Political September 2020 Princeton University Press

A landmark defense of democracy that has been hailed as one of the most important books of the twentieth century

One of the most important books of the twentieth century, *The Open Society and Its Enemies* is an uncompromising defense of liberal democracy and a powerful attack on the intellectual origins of totalitarianism. An immediate sensation when it was first published, Karl Popper's monumental achievement has attained legendary status on both the Left and Right. Tracing the roots of an authoritarian tradition represented by Plato, Marx, and Hegel, Popper argues that the spirit of free, critical inquiry that governs scientific investigation should also apply to politics. In a new foreword, George Soros, who was a student of Popper, describes the "revelation" of first reading the book and how it helped inspire his philanthropic Open Society Foundations.

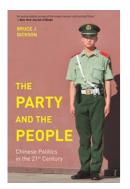

Out of the Dark Night

Achille Mbembe 9780231160285 £25.00 • \$30.00 Hardcover Political Science / Colonialism & Post-Colonialism January 2021 Columbia University Press

Achille Mbembe is one of the world's most profound critics of colonialism and its consequences, a major figure in the emergence of a new wave of French critical theory. His writings examine the complexities of decolonization for African subjectivities and the possibilities emerging in its wake. In *Out of the Dark Night*, he offers a rich analysis of the paradoxes of the postcolonial moment that points toward new liberatory models of community, humanity, and planetarity.

In a nuanced consideration of the African experience, Mbembe makes sweeping interventions into debates about citizenship, identity, democracy, and modernity. He eruditely ranges across European and African thought to provide a powerful assessment of common ways of writing and thinking about the world. Mbembe criticizes the blinders of European intellectuals, analyzing France's failure to heed postcolonial critiques of ongoing exclusions masked by pretenses of universalism. He develops a new reading of African modernity that further develops the notion of Afropolitanism, a novel way of being in the world that has arisen in decolonized Africa in the midst of both destruction and the birth of new societies. *Out of the Dark Night* reconstructs critical theory's historical and philosophical framework for understanding colonial and postcolonial events and expands our sense of the futures made possible by decolonization.

The Party and the People

Bruce J. Dickson 9780691216973 £18.99 • \$22.95 Trade Paperback Political Science / Political Ideologies / Communism, Post-Communism & Socialism May 2023 Princeton University Press

How the Chinese Communist Party maintains its power by both repressing and responding to its people

Since 1949, the Chinese Communist Party (CCP) has maintained unrivaled control over the country, persisting even in the face of economic calamity, widespread social upheaval, and violence against its own people. Yet the party does not sustain dominance through repressive tactics alone—it pairs this with surprising responsiveness to the public. *The Party and the People* explores how this paradox has helped the CCP endure for decades, and how this balance has shifted increasingly toward repression under the rule of President Xi Jinping.

Delving into the tenuous binary of repression and responsivity, Bruce Dickson illuminates numerous questions surrounding the CCP's rule: How does it choose leaders and create policies? When does it allow protests? Will China become democratic? Dickson shows that the party's dual approach lies at the core of its practices—repression when dealing with existential, political threats or challenges to its authority, and responsiveness when confronting localized economic or social unrest. The state answers favorably to the demands of protesters on certain issues, such as local environmental hazards and healthcare, but deals harshly with others, such as protests in Tibet, Xinjiang, or Hong Kong. With the CCP's greater reliance on suppression since Xi Jinping's rise to power in 2012, Dickson considers the ways that this tipping of the scales will influence China's future.

Bringing together a vast body of sources, *The Party and the People* sheds new light on how the relationship between the Chinese state and its citizens shapes governance.

Perception and Misperception in International Politics

Robert Jervis 9780691175850 £28.00 • \$34.00 Trade Paperback Political Science / International Relations May 2017 Princeton University Press

Since its original publication in 1976, *Perception and Misperception in International Politics* has become a landmark book in its field, hailed by the *New York Times* as "the seminal statement of principles underlying political psychology." This new edition includes an extensive preface by the author reflecting on the book's lasting impact and legacy, particularly in the application of cognitive psychological research over the past forty years. Jervis describes the process of perception (for example, how decision makers learn from history) and then explores common forms of misperception (such as overestimating one's influence). He then tests his ideas through a number of important events in international relations from nineteenth- and twentieth-century European history. *Perception and Misperception in International Politics* is essential for understanding international relations today.

POINT OF NO RETURN THOMAS BYRNE EDSALL

The Point of No Return

Thomas Byrne Edsall 9780691164892 £28.00 • \$32.00 Hardcover Political Science / Essays April 2023 Princeton University Press

How Donald Trump laid waste to American politics, culture, and social order

After Donald Trump's rise to power, after the 2020 presidential election, after January 6, is American politics past the point of no return? *New York Times* columnist and political reporter Thomas Byrne Edsall fears that the country may be headed over a cliff, arguing that the election of Donald Trump was the most serious threat to the American political system since the Civil War. In this compelling and illuminating book, Edsall documents how the Trump years ravaged the nation's politics, culture, and social order. He explains the demographic shifts that helped make Trump's election possible, and describes the racial and ethnic conflict, culture wars, rural/urban divide, diverging economies of red and blue states, and the transformation of both the Republican and Democratic parties that have left our politics in a state of permanent hostility.

The Point of No Return brings together a series of Edsall's columns, bookended by a new introduction and conclusion, which show how we got to this dangerous point. These dispatches from our new political landscape chronicle the emergence of what Edsall calls "the not-so-silent white majority" and show how Trump deployed fears about race and immigration to appeal to voters. Edsall examines Trump's construction of an alternate reality, discusses why we don't always vote according to our own self-interest, and explores the Democrats' calibrated response. Considering the 2020 election and its violent aftermath, Edsall looks at the Capitol insurrection and warns that American democracy is under siege. The forces behind Trump's election, and the "stop the steal" true believers, have pushed the nation to the brink.

Political Entrepreneurs

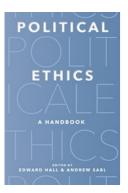

Catherine E. De Vries 9780691254128 £22.00 • \$27.95 Trade Paperback Political Science / Political Process / Political Parties September 2023 Princeton University Press

How challenger parties, acting as political entrepreneurs, are changing European democracies

Challenger parties are on the rise in Europe, exemplified by the likes of Podemos in Spain, the National Rally in France, the Alternative for Germany, or the Brexit Party in Great Britain. Like disruptive entrepreneurs, these parties offer new policies and defy the dominance of established party brands. In the face of these challenges and a more volatile electorate, mainstream parties are losing their grip on power. In this book, Catherine De Vries and Sara Hobolt explore why some challenger parties are so successful and what mainstream parties can do to confront these political entrepreneurs.

Drawing analogies with how firms compete, De Vries and Hobolt demonstrate that political change is as much about the ability of challenger parties to innovate as it is about the inability of dominant parties to respond. Challenger parties employ two types of innovation to break established party dominance: they mobilize new issues, such as immigration, the environment, and Euroscepticism, and they employ antiestablishment rhetoric to undermine mainstream party appeal. Unencumbered by government experience, challenger parties adapt more quickly to shifting voter tastes and harness voter disenchantment. Delving into strategies of dominance versus innovation, the authors explain why European party systems have remained stable for decades, but also why they are now increasingly under strain.

As challenger parties continue to seek to disrupt the existing order, *Political Entrepreneurs* shows that their ascendency fundamentally alters government stability and democratic politics.

Political Ethics

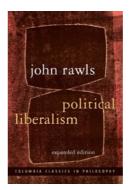

9780691241135 £32.00 • \$37.95 Trade Paperback Philosophy / Political September 2022 Princeton University Press

A comprehensive introduction to contemporary political ethics

What is the relationship between politics and morality? May politicians bend moral constraints in the name of political necessity? Is it always wrong for leaders to lie? How much political compromise is too much (or too little)? In *Political Ethics*, some of the world's leading thinkers in politics, philosophy, and related fields offer a comprehensive and accessible introduction to key issues in this rapidly growing area of political theory.

In a series of original essays, the contributors examine a range of urgent political problems: lies and deception, compromise and refusal to compromise, the meaning and limits of political integrity, representation and failures of representation, good and bad democratic leadership, the virtues and excesses of partisanship, administrative ethics, political corruption, whistleblowing, legitimate and illegitimate claims of political emergency, and lobbying. What emerges are realistic but demanding ethical standards—and a clear-eyed understanding of the ethical challenges of political life in the twenty-first century.

With contributions by Richard Bellamy, Alin Fumurescu, Edward Hall, Suzanne Dovi and Jesse McCain, Eric Beerbohm, Russell Muirhead and Nancy Rosenblum, Joseph Heath, Elizabeth David-Barrett and Mark Philp, Michele Bocchiola and Emanuela Ceva, Nomi Lazar, Phil Parvin, and Andrew Sabl.

Political Liberalism

John Rawls 9780231130899 £22.00 • \$26.95 Trade Paperback Philosophy / Political March 2005 Columbia University Press

This book continues and revises the ideas of justice as fairness that John Rawls presented in *A Theory of Justice* but changes its philosophical interpretation in a fundamental way. That previous work assumed what Rawls calls a "well-ordered society," one that is stable and relatively homogenous in its basic moral beliefs and in which there is broad agreement about what constitutes the good life. Yet in modern democratic society a plurality of incompatible and irreconcilable doctrines—religious, philosophical, and moral—coexist within the framework of democratic institutions. Recognizing this as a permanent condition of democracy, Rawls asks how a stable and just society of free and equal citizens can live in concord when divided by reasonable but incompatible doctrines?

This edition includes the essay "The Idea of Public Reason Revisited," which outlines Rawls' plans to revise *Political Liberalism*, which were cut short by his death.

"An extraordinary well-reasoned commentary on A Theory of Justice...a decisive turn towards political philosophy."

-Times Literary Supplement

Why debunked political rumors persist and how to combat them

misinformation is debunked is who does the debunking.

Drawing on original survey and experimental data. Berinsky shows that a tendency toward conspiratorial thinking and vehement partisan attachment fuel belief in rumors. Yet the reach of rumors is wide, and Berinsky argues that in fighting misinformation, it is as important to target the undecided and the uncertain as it is the true believers. We're all vulnerable to misinformation, and public skepticism about the veracity of political facts is damaging to democracy. Moreover, in a world where most people simply don't pay attention to politics, political leaders are often guilty of

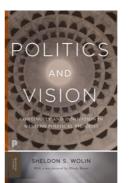

disseminating false information—and failing to correct it when it is proven wrong. Berinsky suggests that we should focus on the messenger as much as the message of rumors. Just as important as how

combat them.

Political Rumors

generations of scholars to come.

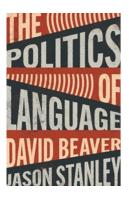

Politics and Vision

Sheldon S. Wolin 9780691174051 £22.00 • \$26.95 Trade Paperback Political Science / History & Theory September 2016 Princeton University Press

Politics and Vision is a landmark work by one of the great thinkers of the twentieth century. This is a significantly expanded edition of one of the greatest works of modern political theory. Sheldon Wolin's *Politics and Vision* inspired and instructed two generations of political theorists after its appearance in Political rumors and misinformation pollute the political landscape. This is not a recent phenomenon; Fortical runnos and misminator pointe the pointer and scape. This is not a recent phenomenon, before the currently rampant and unfounded runnos about a stolen election and vote-rigging, there were other runnors that continued to spread even after they were thoroughly debunked, including doubts about 9/11 (an "inside job") and the furor over President Obama's birthplace and birth certificate. If misinformation crowds out the truth, how can Americans communicate with one another about important issues? In this book, Adam Berinsky examines why political runnors exist and persist despite their unsubstantiated and refuted claims, who is most likely to believe them, and how to combat them. political theorists from Plato to Rawls. Situating them historically while sounding their depths, he critically engages their diverse accounts of politics, theory, power, justice, citizenship, and institutions. The new chapters, which show how thinkers have grappled with the immense possibilities and dangers of modern power, are themselves a major theoretical statewer applied with the immense possibilities and dangets argument that the United States has invented a new political form, "inverted totalitarianism," in which economic rather than political power is dangerously dominant. In this expanded edition, the book that helped to define political theory in the late twentieth century should energize, enlighten, and provoke unmentioned for the unmentioned of the states of the sta

> Wolin originally wrote Politics and Vision to challenge the idea that political analysis should consist simply of the neutral observation of objective reality. He argues that political thinkers must also rely on creative vision. Wolin shows that great theorists have been driven to shape politics to some vision of the Good that lies outside the existing political order. As he tells it, the history of theory is thus, in part, the story of changing assumptions about the Good.

Acclaimed as a tour de force when it was first published, and a major scholarly event when the expanded edition appeared, *Politics and Vision* will instruct, inspire, and provoke for generations to come.

The Politics of Language

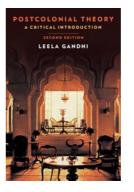

Jason Stanley 9780691181981 £35.00 • \$39.95 Hardcover Philosophy / Political November 2023 Princeton University Press

A provocative case for the inherently political nature of language

In *The Politics of Language*, David Beaver and Jason Stanley present a radical new approach to the theory of meaning, offering an account of communication in which political and social identity, affect, and shared practices play as important a role as information. This new view of language, they argue, has dramatic consequences for free speech, democracy, and a range of other areas in which speech plays a central role

Drawing on a wealth of disciplines, The Politics of Language argues that the function of speechwhether in dialogue, larger group interactions, or mass communication—is to attune people to something, be it a shared reality, emotion, or identity. Reconceptualizing the central ideas of pragmatics and semantics, Beaver and Stanley apply their account to a range of phenomena that defy standard frameworks in linguistics and philosophy of language-from dog whistles and covert persuasion to echo chambers and genocidal speech. The authors use their framework to show that speech is inevitably political because all communication is imbued with the resonances of particular ideologies and their normative perspectives on reality.

At a time when democracy is under attack, authoritarianism is on the rise, and diversity and equality are being demanded, The Politics of Language offers a powerful new vision of the language of politics, ideology, and protest.

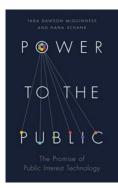

Postcolonial Theory

Leela Gandhi 9780231178396 £22.00 • \$27.00 Trade Paperback Political Science / Colonialism & Post-Colonialism January 2019 Columbia University Press

Published twenty years ago, Leela Gandhi's Postcolonial Theory was a landmark description of the field of postcolonial studies in theoretical terms that set its intellectual context alongside poststructuralism, postmodernism, Marxism, and feminism. Gandhi examined the contributions of major thinkers such as Edward Said, Gayatri Spivak, Homi Bhabha, and the subaltern historians. The book pointed to postcolonialism's relationship with earlier anticolonial thinkers such as Frantz Fanon, Albert Memmi, Ngũgĩ wa Thiong o, and M. K. Gandhi and explained pertinent concepts and schools of thought—hybridity, Orientalism, humanism, Marxist dialectics, diaspora, nationalism, gendered subalternity, globalization, and postcolonial feminism.

The revised edition of this classic work reaffirms its status as a useful starting point for readers new to the field and as a provocative account that opens up possibilities for debate. It includes substantial additions: A new preface and epilogue reposition postcolonial studies within evolving intellectual contexts and take stock of important critical developments. Gandhi examines recent alliances with critical race theory and Africanist postcolonialism, considers challenges from postseular and postcritical perspectives, and takes into account the ontological, environmental, affective, and ethical turns in the changed landscape of critical theory. She describes what is enduring in postcolonial thinking-as a critical perspective within the academy and as an attitude to the world that extends beyond the discipline of postcolonial studies.

Power to the Public

Tara Dawson McGuinness 9780691216645 £12.99 • \$15.95 Trade Paperback Political Science / Public Policy April 2023 Princeton University Press

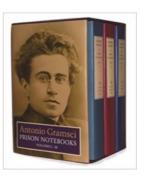

"Worth a read for anyone who cares about making change happen."-Barack Obama

A powerful new blueprint for how governments and nonprofits can harness the power of digital technology to help solve the most serious problems of the twenty-first century

As the speed and complexity of the world increases, governments and nonprofit organizations need new ways to effectively tackle the critical challenges of our time—from pandemics and global warming to social media warfare. In *Power to the Public*, Tara Dawson McGuinness and Hana Schank describe a revolutionary new approach—public interest technology—that has the potential to transform the way governments and nonprofits around the world solve problems. Through inspiring stories about successful projects ranging from a texting service for teenagers in crisis to a streamlined foster care system, the authors show how public interest technology can make the delivery of services to the public more effective and efficient.

At its heart, public interest technology means putting users at the center of the policymaking process, using data and metrics in a smart way, and running small experiments and pilot programs before scaling up. And while this approach may well involve the innovative use of digital technology, technology alone is no panacea—and some of the best solutions may even be decidedly low-tech.

Clear-eyed yet profoundly optimistic, *Power to the Public* presents a powerful blueprint for how government and nonprofits can help solve society's most serious problems.

Prison Notebooks

Antonio Gramsci 9780231157551 £80.00 • \$95.00 Multiple Copy Pack Political Science / History & Theory January 2011 Columbia University Press

Columbia University Press's multivolume *Prison Notebooks* is the only complete critical edition of Antonio Gramsci's seminal writings in English. Based on the authoritative Italian edition of Gramsci's work, *Quaderni del Carcere*, this comprehensive translation presents the intellectual as he ought to be read and understood, with critical notes that clarify Gramsci's history, culture, and sources; an index of names; and a contextualization of the thinker's ideas against his earlier writings and letters. This set includes notebooks 1 through 8 with all attendant notes and materials and is an indispensible resource for scholars in the humanities and social sciences.

Private Government **Private Government** Elizabeth Anderson

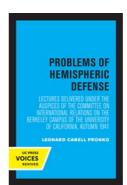

9780691192246 £16.99 • \$19.95 Trade Paperback Philosophy / Political April 2019 Princeton University Press

Elizabeth Anderson

How Employers Rule Our Lives (and Why We Don't Talk about It)

Why our workplaces are authoritarian private governments—and why we can't see it

One in four American workers says their workplace is a "dictatorship." Yet that number almost certainly would be higher if we recognized employers for what they are—private governments with sweeping authoritarian power over our lives. Many employers minutely regulate workers' speech, clothing, and manners on the job, and employers often extend their authority to the off-duty lives of workers, who can be fired for their political speech, recreational activities, diet, and almost anything else employers care to govern. In this compelling book, Elizabeth Anderson examines why, despite all this, we continue to talk as if free markets make workers free, and she proposes a better way to think about the workplace, opening up space for discovering how workers can enjoy real freedom.

How social networks shaped the imperial Chinese state

us better understand state building.

The Rise and Fall of Imperial China Yuhua Wang

9780691215167 £30.00 • \$35.00 Trade Paperback Political Science / World / Asian October 2022 Princeton University Press

China was the world's leading superpower for almost two millennia, falling behind only in the last two

centuries and now rising to dominance again. What factors led to imperial China's decline? The Rise and Fall of Imperial China offers a systematic look at the Chinese state from the seventh century

through to the twentieth. Focusing on how short-lived emperors often ruled a strong state while longlasting emperors governed a weak one, Yuhua Wang shows why lessons from China's history can help

Wang argues that Chinese rulers faced a fundamental trade-off that he calls the sovereign's dilemma: a

coherent elite that could collectively strengthen the state could also overthrow the ruler. This dilemma emerged because strengthening state capacity and keeping rulers in power for longer required different social networks in which central elites were embedded. Wang examines how these social

networks shaped the Chinese state, and vice versa, and he looks at how the ruler's pursuit of power by fragmenting the elites became the final culprit for China's fall. Drawing on more than a thousand years of Chinese history, *The Rise and Fall of Imperial China* highlights the role of elite social relations in influencing the trajectories of state development.

KATHARINA VOLK The ROMAN REPUBLIC of LETTERS SCHOLARSHIP, PHILOSOPHY, AND POLITICS IN THE AGE OF CICLERO AND CARSAR

The Roman Republic of Letters Katharina Volk

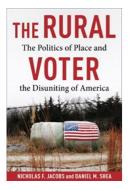

9780691253954 £22.00 • \$27.95 Trade Paperback Philosophy / Political December 2023 Princeton University Press

An intellectual history of the late Roman Republic—and the senators who fought both scholarly debates and a civil war

In *The Roman Republic of Letters*, Katharina Volk explores a fascinating chapter of intellectual history, focusing on the literary senators of the mid-first century BCE who came to blows over the future of Rome even as they debated philosophy, history, political theory, linguistics, science, and religion.

It was a period of intense cultural flourishing and extreme political unrest—and the agents of each were very often the same people. Members of the senatorial class, including Cicero, Caesar, Brutus, Cassius, Cato, Varro, and Nigidius Figulus, contributed greatly to the development of Roman scholarship and engaged in a lively and often polemical exchange with one another. These men were also crucially involved in the tumultuous events that brought about the collapse of the Republic, and they ended up on opposite sides in the civil war between Caesar and Pompey in the early 40s. Volk treats the intellectual and political activities of these "senator scholars" as two sides of the same coin, exploring how scholarship and statesmanship mutually informed one another—and how the acquisition, organization, and diffusion of knowledge was bound up with the question of what it meant to be a Roman in a time of crisis.

By revealing how first-century Rome's remarkable "republic of letters" was connected to the fight over the actual *res publica*, Volk's riveting account captures the complexity of this pivotal period.

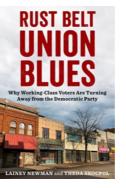

The Rural Voter

Daniel Shea 9780231211581 £32.00 • \$38.00 Hardcover Political Science / Political Process / Campaigns & Elections November 2023 Columbia University Press

The widening gulf between rural and urban America is becoming the most serious political divide of our day. Support for Democrats, up and down the ballot, has plummeted throughout the countryside, and the entire governing system is threatened by one-party dominance. After Donald Trump's surprising victories throughout rural America, pundits and journalists went searching for answers, popping into roadside diners and opining from afar. Rural Americans are supposedly bigots, culturally backward, lazy, scared of the future, and radical. But is it that simple? Is the country splintering between two very different Americas—one rural, one urban?

This pathbreaking book pinpoints forces behind the rise of the "rural voter"—a new political identity that combines a deeply felt sense of place with an increasingly nationalized set of concerns. Combining a historical perspective with the largest-ever national survey of rural voters, Nicholas F. Jacobs and Daniel M. Shea uncover how this overwhelmingly crucial voting bloc emerged and how it has roiled American politics. They show how perceptions of economic and social change, racial anxieties, and a traditional way of life under assault have converged into a belief in rural uniqueness and separateness. Rural America believes it rises and falls together, and that the Democratic Party stands in the way.

An unparalleled exploration of rural partisanship, this book offers a timely warning that the chasm separating urban and rural Americans cannot be papered over with policies or rhetoric. Instead, *The Rural Voter* demonstrates, this division strikes at the heart of enduring conflicts over American identity.

Rust Belt Union Blues

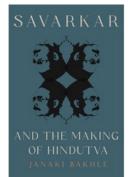

Lainey Newman 9780231208826 £22.00 • \$26.95 Hardcover Political Science / Political Process / Campaigns & Elections September 2023 Columbia University Press

In the heyday of American labor, the influence of local unions extended far beyond the workplace. Unions were embedded in tight-knit communities, touching nearly every aspect of the lives of members—mostly men—and their families and neighbors. They conveyed fundamental worldviews, making blue-collar unionists into loyal Democrats who saw the party as on the side of the working man. Today, unions play a much less significant role in American life. In industrial and formerly industrial Rust Belt towns, Republican-leaning groups and outlooks have burgeoned among the kinds of voters who once would have been part of union communities.

Lainey Newman and Theda Skocpol provide timely insight into the relationship between the decline of unions and the shift of working-class voters away from Democrats. Drawing on interviews, union newsletters, and ethnographic analysis, they pinpoint the significance of eroding local community ties and identities. Using western Pennsylvania as a case study, Newman and Skocpol argue that union members' loyalty to Democratic candidates was as much a product of the group identity that unions fostered as it was a response to the Democratic Party's economic policies. As the social world around organized labor dissipated, conservative institutions like gun clubs, megachurches, and other Republican-leaning groups took its place.

Rust Belt Union Blues sheds new light on why so many union members have dramatically changed their party politics. It makes a compelling case that Democrats are unlikely to rebuild credibility in places like western Pennsylvania unless they find new ways to weave themselves into the daily lives of workers and their families.

Savarkar and the Making of Hindutva

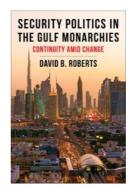

Janaki Bakhle 9780691250366 £38.00 • \$45.00 Hardcover Biography & Autobiography / Political February 2024 Princeton University Press

A monumental intellectual history of the pivotal figure of Hindu nationalism

Vinayak Damodar Savarkar (1883–1966) was an intellectual, ideologue, and anticolonial nationalist leader in India's struggle for independence from British colonial rule, one whose anti-Muslim writings exploited India's tensions in pursuit of Hindu majority rule. *Savarkar and the Making of Hindutva* is the first comprehensive intellectual history of one of the most contentious political thinkers of the twentieth century.

Janaki Bakhle examines the full range of Savarkar's voluminous writings in his native language of Marathi, from political and historical works to poetry, essays, and speeches. She reveals the complexities in the various positions he took as a champion of the beleaguered Hindu community, an anticaste progressive, an erudite if polemical historian, a pioneering advocate for women's dignity, and a patriotic poet. This critical examination of Savarkar's thought shows that Hindutva is as much about the aesthetic experiences that have been attached to the idea of India itself as it is a militant political program that has targeted the Muslim community in pursuit of power in postcolonial India.

By bringing to light the many legends surrounding Savarkar, Bakhle shows how this figure from a provincial locality in colonial India rose to world-historical importance. *Scaurkar and the Making of Hindutva* also uncovers the vast hagiographic literature that has kept alive the myth of Savarkar as a uniquely brave, brilliant, and learned revolutionary leader of the Hindu nation.

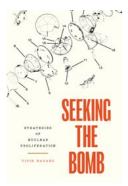

Security Politics in the Gulf Monarchies

David B. Roberts 9780231205252 £30.00 • \$35.00 Trade Paperback Political Science / World / Middle Eastern April 2023 Columbia University Press

The Gulf monarchies—Saudi Arabia, Kuwait, Bahrain, Qatar, Oman, and the United Arab Emirates play crucial roles in world markets and politics. Their economies, which have traditionally been driven by oil revenues, have simultaneously propelled transformative change and preserved the traditional order. Fossil fuel wealth has underwritten an implicit social contract characterized by generous welfare states, ruler-centric politics, and a heavy state presence in the economy, facilitating stability during tumultuous times. However, as the transition toward renewable energy looms, will the Gulf monarchies be able to adapt?

David B. Roberts offers a definitive guide to continuity and change in the Gulf region. He explores the forces challenging and bolstering the status quo across the political, social, economic, military, and environmental dimensions of security. Roberts examines the six monarchies individually and holistically, considering their recent histories and contemporary concerns. Beneath wide-ranging changes affecting these countries, he pinpoints key dynamics and structures that have persisted over the long term. The book examines key topics such as generational change in leadership, migrant workers, female labor force participation, U.S. military influence, and the multifaceted threat of climate change. Roberts scrutinizes how a move away from the oil-centered economic model could reverberate across the social spectrum, with profound implications for security. Suitable for a range of courses and offering important new insights for experts, this book is an accessible and up-to-date overview of the politics of a key world region.

Seeking the Bomb

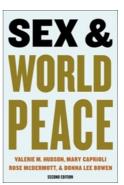

Vipin Narang 9780691172620 £28.00 • \$32.00 Trade Paperback Political Science / International Relations January 2022 Princeton University Press

The first systematic look at the different strategies that states employ in their pursuit of nuclear weapons

Much of the work on nuclear proliferation has focused on *why* states pursue nuclear weapons. The question of *how* states pursue nuclear weapons has received little attention. *Seeking the Bomb* is the first book to analyze this topic by examining which strategies of nuclear proliferation are available to aspirants, why aspirants select one strategy over another, and how this matters to international politics.

Looking at a wide range of nations, from India and Japan to the Soviet Union and North Korea to Iraq and Iran, Vipin Narang develops an original typology of proliferation strategies—hedging, sprinting, sheltered pursuit, and hiding. Each strategy of proliferation provides different opportunities for the development of nuclear weapons, while at the same time presenting distinct vulnerabilities that can be exploited to prevent states from doing so. Narang delves into the crucial implications these strategies have for nuclear proliferation and international security. Hiders, for example, are especially disruptive since either they successfully attain nuclear weapons, irrevocably altering the global power structure, or they are discovered, potentially triggering serious crises or war, as external powers try to halt or reverse a previously clandestine nuclear weapons.

As the international community confronts the next generation of potential nuclear proliferators, *Seeking the Bomb* explores how global conflict and stability are shaped by the ruthlessly pragmatic ways states choose strategies of proliferation.

Sex and World Peace

Valerie Hudson 9780231204750 £22.00 • \$26.00 Trade Paperback Social Science / Gender Studies May 2023 Columbia University Press

Sex and World Peace is a groundbreaking demonstration that the security of women is a vital factor in the occurrence of conflict and war, unsettling a wide range of assumptions in political and security discourse. Harnessing an immense amount of data, it relates microlevel violence against women and macrolevel state peacefulness across global settings.

The authors find that the treatment of women informs human interaction at all levels of society. They call attention to the adverse effects on state security of sex-based inequities such as sex ratios favoring males, the practice of polygamy, and lax enforcement of national laws protecting women. Their research challenges conventional definitions of security and democracy and common understandings of the causes of world events. The book considers a range of ways to remedy these injustices, including top-down and bottom-up approaches to redressing violence against women and the lack of sex parity in decision-making. Advocating a state responsibility to protect women, the authors campaign against women's systemic insecurity, which threatens the security of all.

Sex and World Peace has been a go-to book for instructors, advocates, and policy makers since its publication in 2012. Since then, there have been major changes in world affairs, including the #MeToo movement, as well as advances in both theoretical and empirical literature surrounding the subject. This second edition, which adds coauthors Rose McDermott and Donna Lee Bowen alongside Valerie M. Hudson and Mary Caprioli, revises and updates the book for a new generation. The book retains its foundational overview of the relationship between women's oppression and war, enhanced by fresh data and new material covering recent developments for global women's rights and analysis of additional examples of gender and conflict throughout the world.

	SOFIA FENNER

Sofia Fenner 9780231208598 £30.00 • \$35.00 Trade Paperback Political Science / Political Ideologies / Fascism & Totalitarianism July 2023 Columbia University Press

The Society of the Spectacle
Guy Debord

AN A DECK

The Society of the Spectacle

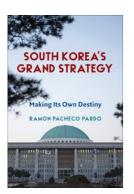

Guy Debord 9780942299793 £18.99 • \$22.95 Trade Paperback Political Science / History & Theory January 1995 Zone Books

Durable authoritarian rule often rests on the co-optation of challengers. The conventional story is straightforward: rulers entice opposition groups to "sell out," offering them benefits if they set aside their antiauthoritarian aspirations and become part of the system. However, co-optation does not always neutralize former adversaries, and even seemingly domesticated opponents can turn on their rulers. Co-optation does weaken opposition—but it is not as simple, reliable, or transactional as existing theories claim.

Shouting in a Cage offers new ways to understand co-optation's power and its limits by examining two co-opted parties, the Wafd Party in Egypt and the Istiqlal Party in Morocco. Sofia Fenner argues that co-optation is less a corrupt bargain than a discursive contest—a clash of competing interpretations. Co-opted parties conjure up imagined futures in which their short-term choices will lead to the realization of their long-term democratic goals. Meanwhile, other actors point to the disconnect between these parties' antiauthoritarian aspirations and their participation in authoritarian systems. Fenner demonstrates that co-opted parties come to look hypocritical precisely because they refuse to give up their oppositional commitments. Their credibility sapped, they become unappealing allies and, eventually, political afterthoughts. However, such parties retain a surprising capacity for opposition, rooted in the literal and metaphorical idea of "party as family." Based on extensive archival research and ethnographic fieldwork in North Africa, *Shouting in a Cage* broadens our understanding of political behavior under authoritarianism.

Few works of political and cultural theory have been as enduringly provocative as Guy Debord's *Society of the Spectacle.* From its publication amid the social upheavals of the 1960s to the present, the volatile theses of this book have decisively transformed debates on the shape of modernity, capitalism, and everyday life in the late twentieth century. Now finally available in a superb English translation approved by the author, Debord's text remains as crucial as ever for understanding the contemporary effects of power, which are increasingly inseparable from the new virtual worlds of our rapidly changing image / information culture.

"In all that has happened in the last twenty years, the most important change lies in the very continuity of the spectacle. Quite simply, the spectacle's domination has succeeded in raising a whole generation moulded to its laws. The extraordinary new conditions in which this entire generation has lived constitute a comprehensive summary of all that, henceforth, the spectacle will forbid; and also all that it will permit."— Guy Debord (1988)

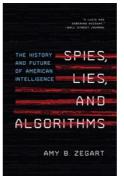

South Korea's Grand Strategy

Ramon Pacheco Pardo 9780231203234 £30.00 • \$35.00 Trade Paperback Political Science / World / Asian October 2023 Columbia University Press

Since the end of the Cold War, South Korea has taken on a greater role in global affairs. Ramon Pacheco Pardo provides a groundbreaking analysis of South Korea's foreign policy from its transition to democracy in the late 1980s through the present day, arguing that the country's approach to the world constitutes a grand strategy.

This book examines the key factors and goals that shape South Korea's long-term strategy, with analysis that brings together its diplomatic, military, economic, and soft-power components. Pacheco Pardo shows that South Korea's fundamental aim has been to move beyond its past as a "shrimp among whales" and instead attain autonomy and freedom of action. He explores how South Korea's neaders across parties and governments have pursued security, prosperity, and status. Pacheco Pardo tracks South Korea's core relationships with North Korea, the United States, and China, and he details the country's objectives and policies across East Asia, the Asia-Pacific region, and the rest of the world.

Drawing on in-depth interviews with past and present policy makers, this book presents an analytical account of how South Korean strategy is made and practiced. It expertly lays out South Korea's grand strategy and, more broadly, makes a compelling case that middle powers like South Korea can implement grand strategies.

Spies, Lies, and Algorithms

Amy B. Zegart 9780691223070 £17.99 • \$21.95 Trade Paperback Political Science / Security (National & International) February 2023 Princeton University Press

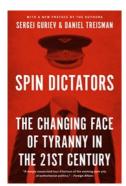

A riveting account of espionage for the digital age, from one of America's leading intelligence experts

Spying has never been more ubiquitous—or less understood. The world is drowning in spy movies, TV shows, and novels, but universities offer more courses on rock and roll than on the CIA and there are more congressional experts on powdered milk than espionage. This crisis in intelligence education is distorting public opinion, fueling conspiracy theories, and hurting intelligence policy. In *Spies, Lies, and Algorithms, Amy Zegart separates fact from fiction as she offers an engaging and enlightening account of the past, present, and future of American espionage as it faces a revolution driven by digital technology.*

Drawing on decades of research and hundreds of interviews with intelligence officials, Zegart provides a history of U.S. espionage, from George Washington's Revolutionary War spies to today's spy satellites; examines how fictional spies are influencing real officials; gives an overview of intelligence basics and life inside America's intelligence agencies; explains the deadly cognitive biases that can mislead analysts; and explores the vexed issues of traitors, covert action, and congressional oversight. Most of all, Zegart describes how technology is empowering new enemies and opportunities, and creating powerful new players, such as private citizens who are successfully tracking nuclear threats using little more than Google Earth. And she shows why cyberspace is, in many ways, the ultimate cloak-and-dagger battleground, where nefarious actors employ deception, subterfuge, and advanced technology for theft, espionage, and information warfare.

A fascinating and revealing account of espionage for the digital age, *Spies, Lies, and Algorithms* is essential reading for anyone who wants to understand the reality of spying today.

Spin Dictators

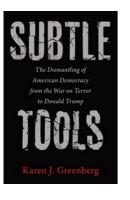

Daniel Treisman 9780691224473 £14.99•\$21.95 Trade Paperback Political Science / Political Ideologies / Fascism & Totalitarianism April 2023 Princeton University Press

How a new breed of dictators holds power by manipulating information and faking democracy

Hitler, Stalin, and Mao ruled through violence, fear, and ideology. But in recent decades a new breed of media-savvy strongmen has been redesigning authoritarian rule for a more sophisticated, globally connected world. In place of overt, mass repression, rulers such as Vladimir Putin, Recep Tayyip Erdogan, and Viktor Orbán control their citizens by distorting information and simulating democratic procedures. Like spin doctors in democracies, they spin the news to engineer support. Uncovering this new brand of authoritarianism, Sergei Guriev and Daniel Treisman explain the rise of such "spin dictators," describing how they emerge and operate, the new threats they pose, and how democracies should respond.

Spin Dictators traces how leaders such as Singapore's Lee Kuan Yew and Peru's Alberto Fujimori pioneered less violent, more covert, and more effective methods of monopolizing power. They cultivated an image of competence, concealed censorship, and used democratic institutions to undermine democracy, all while increasing international engagement for financial and reputational benefits. The book reveals why most of today's authoritarians are spin dictators—and how they differ from the remaining "fear dictators" such as Kim Jong-un and Bashar al-Assad, as well as from masters of high-tech repression like Xi Jinping.

Offering incisive portraits of today's authoritarian leaders, *Spin Dictators* explains some of the great political puzzles of our time—from how dictators can survive in an age of growing modernity to the disturbing convergence and mutual sympathy between dictators and populists like Donald Trump.

Subtle Tools

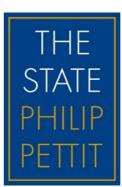

Karen J. Greenberg 9780691216577 £15.99 • \$18.95 Trade Paperback Political Science / Security (National & International) February 2023 Princeton University Press

How policies forged after September 11 were we aponized under Trump and turned on American democracy itself

In the wake of the September 11 terror attacks, the American government implemented a wave of overt policies to fight the nation's enemies. Unseen and undetected by the public, however, another set of tools was brought to bear on the domestic front. In this riveting book, one of today's leading experts on the US security state shows how these "subtle tools" imperiled the very foundations of democracy, from the separation of powers and transparency in government to adherence to the Constitution.

Taking readers from Ground Zero to the Capitol insurrection, Karen Greenberg describes the subtle tools that were forged under George W. Bush in the name of security: imprecise language, bureaucratic confusion, secrecy, and the bypassing of procedural and legal norms. While the power and legacy of these tools lasted into the Obama years, reliance on them increased exponentially in the Trump era, both in the fight against terrorism abroad and in battles closer to home. Greenberg discusses how the Trump administration weaponized these tools to separate families at the border, suppress Black Lives Matter protests, and attempt to overturn the 2020 presidential election.

Revealing the deeper consequences of the war on terror, *Subtle Tools* paints a troubling portrait of an increasingly undemocratic America where disinformation, xenophobia, and disdain for the law became the new norm, and where the subtle tools of national security threatened democracy itself.

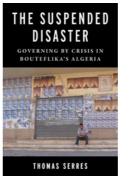

The State

Philip Pettit 9780691182209 £35.00 • \$39.95 Hardcover Political Science / History & Theory March 2023 Princeton University Press

A major new account of the state and its importance by a leading political philosopher

The future of our species depends on the state. Can states resist corporate capture, religious zealotry, and nationalist mania? Can they find a way to work together so that the earth heads and its peoples prosper? Or is the state just not up to the task? In this book, the prominent political philosopher Philip Pettit examines the nature of the state and its capacity to serve goals like peace and justice within and beyond its borders. In doing so, he breaks new ground by making the state the focus of political theory —with implications for economic, legal, and social theory—and presents a persuasive, historically informed image of an institution that lies at the center of our lives.

Offering an account that is more realist than utopian, Pettit starts from the function the polity is meant to serve, looks at how it can best discharge that function, and explores its ability to engage beneficially in the life of its citizens. This enables him to identify an ideal of statehood that is a precondition of justice. Only if states approximate this functional ideal will they be able to deal with the perennial problems of extreme poverty and bitter discord as well as the challenges that loom over the coming centuries, including climate change, population growth, and nuclear arms.

The Suspended Disaster

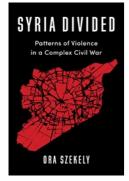

Thomas Serres 9780231212038 £30.00 • \$35.00 Trade Paperback Political Science / World / African September 2023 Columbia University Press

After Algeria's president Abdelaziz Bouteflika announced his intention to run for a fifth term in early 2019, a popular peaceful uprising erupted calling for change. Bouteflika, who had been in office since 1999, was eventually forced to resign, but the Hirak ("movement") continued to protest the country's inequalities and entrenched ruling elite.

The Suspended Disaster examines the dynamics of the Algerian political system, offering new insights into the last years of Bouteflika's rule and the factors that shaped the emergence of an unexpected social movement. Thomas Serres argues that the Algerian ruling coalition developed a mode of government based on the management of a seemingly never-ending crisis, marked by an obsession with security and the ever-present possibility of unrest, violence, and economic collapse. Identifying this form of rule as "governance by catastrophization," he shows how attempts to preserve the status quo through emergency policies and constant reforms can also lay the groundwork for a revolutionary situation. Serres contrasts the government's portrayal of perpetually imminent disaster with the uncertainty, precarity, and indignity experienced by much of the population, which fueled the rejection of ruling elites, a profound mistrust toward institutions, and new spaces for grassroots opposition.

Based on extensive fieldwork and theoretically novel, *The Suspended Disaster* sheds new light on the political, economic, and social processes underlying an uprising that changed the face of Algerian politics.

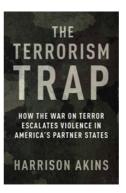

Syria Divided

Ora Szekely 9780231205399 £30.00 • \$35.00 Trade Paperback Political Science / World / Middle Eastern August 2023 Columbia University Press

The civil war in Syria—which has claimed more than 600,000 lives and displaced over half of the country's population since 2011—is an enormously complex conflict. The combatants include a wide array of state and nonstate forces, both Syrian and international. Adding to the war's complexity, its many participants understand and explain the war in a range of different ways. For some, it is a fight for dignity and democracy; for others, a sectarian or communal conflict; still others see it as a fight against terrorism or a consequence of foreign interference.

Ora Szekely draws on sources including in-depth interviews, conflict data, and propaganda distributed through social media to examine how these competing narratives have shaped the course of the conflict. Mapping out the broad patterns of violence among combatants and against civilians, Szekely argues that the competition to control the narrative in the eyes of important audiences at home and abroad has not only influenced the choices of participants, it has also—shaped in part by the use of social media—led many to treat warfare as a kind of performance.

An insightful analysis of the forces fueling a brutal civil war, *Syria Divided* offers new perspectives on the performative aspects of violence, the weaponization of social media, and key features of twenty-first-century warfare.

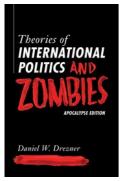

The Terrorism Trap

Harrison Akins 9780231209878 £30.00 • \$35.00 Trade Paperback Political Science / Terrorism June 2023 Columbia University Press

After two decades and trillions of dollars, the United States' fight against terrorism has achieved mixed results. Despite the vast resources and attention expended since 9/11, terrorism has increased in many societies that have been caught up in the war on terror. Why have U.S. policies been unable to stem the tide of violence?

Harrison Akins reveals how the war on terror has had the unintended consequence of increasing domestic terrorism in U.S. partner states. He examines the results of U.S. backed counterterrorism operations that targeted al-Qaeda in peripheral regions of partner states, over which their central governments held little control. These operations often provoked a violent backlash from local terrorist groups, leading to a spike in retaliatory attacks against partner states. Senior U.S. officials frequently failed to grasp the implications of the historical conflict between central governments and the targeted peripheries. Instead, they exerted greater pressure on partner states to expand their counterterrorism efforts. This exacerbated the underlying conditions that drove the escalating attacks, trapping these governments in a deadly cycle of tit-for-tat violence with local terrorist groups. This process, Akins demonstrates, accounts for the lion's share of the al Qaeda network's global terrorist activity since 2001.

Drawing on extensive primary sources—including newly declassified documents, dozens of in-depth interviews with leading government officials in the United States and abroad, and statistical analysis—*The Terrorism Trap* is a groundbreaking analysis of why counterterrorism has backfired.

Theories of International Politics and Zombies

Daniel W. Drezner 9780691223513 £17.99 • \$21.95 Trade Paperback Political Science / International Relations July 2022 Princeton University Press

How international relations theory can be applied to a zombie invasion

What would happen to international politics if the dead rose from the grave and started to eat the living? Daniel Drezner's groundbreaking book answers the question that other international relations scholars have been too scared to ask. Addressing timely issues with analytical bite, Drezner looks at how well-known theories from international relations might be applied to a war with zombies. Exploring the plots of popular zombie films, songs, and books, *Theories of International Politics and Zombies* predicts realistic scenarios for the political stage in the face of a zombie threat and considers how valid—or how rotten—such scenarios might be.

With worldwide calamity feeling ever closer, this new apocalyptic edition includes updates throughout as well as a new chapter on postcolonial perspectives.

To Build a Black Future

Christopher Paul Harris 9780691219066 £22.00 • \$27.95 Hardcover Political Science / Civil Rights September 2023 Princeton University Press

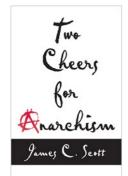

An incisive portrait of how the new Black politics can forge a future centered on collective action, community, and care

When #BlackLivesMatter emerged in 2013, it animated the most consequential Black-led mobilization since the civil rights and Black power era. Today, the hashtag turned rallying cry is but one expression of a radical reorientation toward Black politics, protest, and political thought. *To Build a Black Future* examines the spirit and significance of this insurgency, offering a revelatory account of a new political culture–responsive to pain, suffused with joy, and premised on care–emerging from the centurieslong arc of Black rebellion, a tradition that traces back to the Black slave.

Drawing on his own experiences as an activist and organizer, Christopher Paul Harris takes readers inside the Movement for Black Lives (M4BL) to chart the propulsive trajectory of Black politics and thought from the Middle Passage to the present historical moment. Carefully attending to the social forces that produce Black struggle and the contradictions that arise within it, Harris illustrates how M4BL gives voice to an abolitionist praxis that bridges the past, present, and future, outlining a political project at once directed inward to the Black community while issuing an outward challenge to the world.

Essential reading for the age of #BlackLivesMatter, this visionary and provocative book reveals how the radical politics of joy, pain, and care, in sharp contrast to liberal political thought, can build a Black future that transcends ideology and pushes the boundaries of our political imagination.

A spirited defense of the anarchist approach to life

and workplaces to retirement homes and government itself.

Two Cheers for Anarchism James C. Scott

9780691161037 £14.99 • \$17.95 Trade Paperback Political Science / Political Ideologies / Anarchism March 2014 Princeton University Press

James Scott taught us what's wrong with seeing like a state. Now, in his most accessible and personal

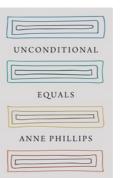

book to date, the acclaimed social scientist makes the case for seeing like an anarchist. Inspired by the core anarchist faith in the possibilities of voluntary cooperation without hierarchy, *Two Cheers for*

Anarchism is an engaging, high-spirited, and often very funny defense of an anarchist way of seeing— one that provides a unique and powerful perspective on everything from everyday social and political interactions to mass protests and revolutions. Through a wide-ranging series of memorable anecdotes and examples, the book describes an anarchist sensibility that celebrates the local knowledge, common

sense, and creativity of ordinary people. The result is a kind of handbook on constructive anarchism that challenges us to radically reconsider the value of hierarchy in public and private life, from schools

Beginning with what Scott calls "the law of anarchist calisthenics," an argument for law-breaking inspired by an East German pedestrian crossing, each chapter opens with a story that captures an essential anarchist truth. In the course of telling these stories, Scott touches on a wide variety of subjects: public disorder and riots, desertion, poaching, vernacular knowledge, assembly-line production, globalization, the petty bourgeoisie, school testing, playgrounds, and the practice of bittorical explanation

Far from a dogmatic manifesto, Two Cheers for Anarchism celebrates the anarchist confidence in the inventiveness and judgment of people who are free to exercise their creative and moral capacities

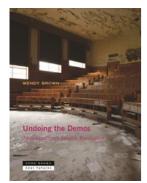

Unconditional Equals

Anne Phillips 9780691226163 £18.99 • \$22.95 Trade Paperback Philosophy / Political May 2023 Princeton University Press

Why equality cannot be conditional on a shared human "nature" but has to be for all

For centuries, ringing declarations about all men being created equal appealed to a shared human nature as the reason to consider ourselves equals. But appeals to natural equality invited gradations of natural difference, and the ambiguity at the heart of "nature" enabled generations to write of people as equal by nature while barely noticing the exclusion of those marked as inferior by their gender, race, or class. Despite what we commonly tell ourselves, these exclusions and gradations continue today. In *Unconditional Equals*, political philosopher Anne Phillips challenges attempts to justify equality by reference to a shared human nature, arguing that justification turns into conditions and ends up as exclusion. Rejecting the logic of justification, she calls instead for a genuinely unconditional equality.

Drawing on political, feminist, and postcolonial theory, Unconditional Equals argues that we should understand equality not as something grounded in shared characteristics but as something people enact when they refuse to be considered inferiors. At a time when the supposedly shared belief in human equality is so patently not shared, the book makes a powerful case for seeing equality as a commitment we make to ourselves and others, and a claim we make on others when they deny us our status as equals.

historical explanation.

Undoing the Demos

Wendy Brown 9781935408543 £16.99 • \$19.95 Trade Paperback Political Science / Political Economy November 2017 Zone Books

Neoliberal rationality - ubiquitous today in statecraft and the workplace, in jurisprudence, education, and culture - remakes everything and everyone in the image of homo oeconomicus. What happens when this rationality transposes the constituent elements of democracy into an economic regi vivid detail, Wendy Brown explains how democracy itself is imperiled. ter? In

The demos disintegrates into bits of human capital; concerns with justice cede to the mandates of growth rates, credit ratings, and investment climates; liberty submits to the imperative of human capital appreciation; equality dissolves into market competition; and popular sovereignty grows incoherent. Liberal democratic practices may not survive these transformations. Radical democratic dreams may not either.

In an original and compelling theoretical argument, Brown explains how and why neoliberal reason undoes the political form and political imaginary it falsely promises to secure and reinvigorate. Through meticulous analyses of neoliberalized law, political practices, governance, and education, she charts the new common sense.

Undoing the Demos makes clear that, far from being the lodestar of the twenty-first century, a future for democracy depends upon it becoming an object of struggle and rethinking.

SCOTT A. SNYDER

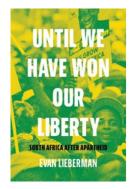

9780231208697 £30.00 • \$35.00 Trade Paperback Political Science / International Relations / Diplomacy November 2023 Columbia University Press

The alliance between the United States and South Korea has endured through seven decades of shifting regional and geopolitical security contexts. Yet it now faces challenges from within. Domestic political turmoil, including deepening political polarization and rising nationalism in both countries has cast doubt on the alliance's viability—with critical implications for the balance of power in East Asia

Scott A. Snyder provides an authoritative overview of the internal and external pressures on the U.S.– South Korea alliance and explores its future prospects. He argues that nationalist leaders' accession to power could put past successes at risk and endanger the national security objectives of both countries. In the United States, "America first" nationalism favors self-interest over cooperation and portrays allies as burdens or even free riders. "Korea first" sentiments, in both progressive and conservative forms, present the U.S. military presence in South Korea as an obstacle to Korean reconciliation or a shackle on South Korea's freedom of action. Snyder also examines North Korea's attempts to influence South Korean domestic politics and how China's growing strength has affected the dynamics of the alliance. He considers scenarios in which the U.S.-South Korea relationship weakens or crumbles, emphasizing the consequences for the region and the world. Drawing on this analysis, Snyder offers timely recommendations for stakeholders in both countries on how to preserve and strengthen the alliance

Until We Have Won Our

Liberty Evan Lieberman 9780691203003 £28.00 • \$32.00 Hardcover Political Science / World / African June 2022 Princeton University Press

A compelling account of South Africa's post-Apartheid democracy

At a time when many democracies are under strain around the world, *Until We Have Won Our Liberty* shines new light on the signal achievements of one of the contemporary era's most closely watched transitions away from minority rule. South Africa's democratic development has been messy, fiercely contested, and sometimes violent. But as Evan Lieberman argues, it has also offered a voice to the voiceless, unprecedented levels of government accountability, and tangible improvements in quality of life.

Lieberman opens with a first-hand account of the hard-fought 2019 national election, and how it played out in Mogale City, a post-Apartheid municipality created from Black African townships and White Afrikaner suburbs. From this launching point, he examines the complexities of South Africa's multiracial society and the unprecedented democratic experiment that began with the election of Nelson Mandela in 1994. While acknowledging the enormous challenges many South Africans continue to face—including unemployment, inequality, and discrimination—Lieberman draws on the country's history and the experience of comparable countries to demonstrate that elected Black-led governments have, without resorting to political extremism, improved the lives of millions. In the context of open and competitive politics, citizens have gained access to housing, basic services, and dignified treatment to a greater extent than during any prior period.

Countering much of the conventional wisdom about contemporary South Africa, Until We Have Won Our Liberty offers hope for the enduring impact of democratic ideals.

A Vision for Europe 2020

David Adler 9781912475285 £20.00 • \$25.00 Trade Paperback Political Science June 2020 Eris

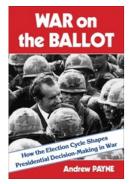

An international all-star cast of thinkers, artists, and policy makers joins forces for a transparent, united, democratic Europe.

A Vision for Europe 2020 features contributions by Kate Aronoff, Noam Chomsky, Naomi Klein, Bill McKibben, Evgeny Morozov, Jerome Roos, Elif Shafak, Slavoj Žižek, Shoshana Zuboff and more.

The European Union was an exceptional achievement. It brought together and in peace peoples speaking different languages and submersed in different cultures, proving that it was possible to create a shared framework of human rights across a continent that was not long ago tormented by murderous chauvinism, racism, and barbarity. It could have been the proverbial Beacon on the Hill, showing the world how peace and solidarity may be snatched from the jaws of age-old conflict and bigotry.

But things turned out differently. Today, a common bureaucracy and a common currency divide Europeans who were beginning to unite despite their different languages and cultures. A confederacy of myopic politicians, economically naïve officials, and financially incompetent 'experts' submit slavishly to the edicts of financial and industrial conglomerates, alienating people and stirring up a dangerous anti-European backlash. Proud peoples are being turned against each other. Nationalism, extremism and racism are being re-awakened.

With contributions from some of the world's foremost thinkers, artists and politicians covering the full spectrum of concerns for the future of the Union, this volume presents realistic and viable alternatives to the mainstream barrage of dreadful prospects—a true vision for Europe.

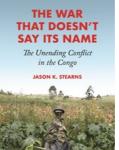

War on the Ballot

Andrew Payne 9780231209656 £30.00 • \$35.00 Trade Paperback Political Science / Political Process / Campaigns & Elections July 2023 Columbia University Press

The president of the United States is at once holder of the highest elected office and commander in chief of the armed forces. How do upcoming elections influence presidents' behavior during wartime? How do presidents balance perceptions of the national interest with personal political interests?

War on the Ballot examines how electoral politics shaped presidential decisions on military and diplomatic strategy during the wars in Korea, Vietnam, and Iraq. Drawing on a wealth of declassified documents and interviews with senior officials and military officers, Andrew Payne reveals the surprisingly large role played by political considerations during conflicts. He demonstrates how the exigencies of the electoral cycle drove leaders to miss opportunities to limit the human and financial costs of each war, gain strategic advantage, or sue for peace, sometimes making critical decisions with striking disregard for the consequences on the ground. Payne emphasizes the importance of electoral pressures throughout the full course of a conflict, not just around the initial decision to intervene. He shows how electoral constraints operate across different phases of the political calendar, going beyond the period immediately preceding a presidential election.

Offering a systematic analysis of the relationship between electoral politics and wartime decisionmaking, this book raises crucial questions about democratic accountability in foreign policy.

The War That Doesn't Say Its Name

Jason K. Stearns 9780691224510 £18.99•\$22.95 Trade Paperback Political Science / World / African August 2023 Princeton University Press

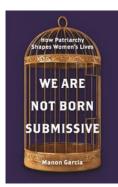

Why violence in the Congo has continued despite decades of international intervention

Well into its third decade, the military conflict in the Democratic Republic of the Congo has been dubbed a "forever war"—a perpetual cycle of war, civil unrest, and local feuds over power and identity. Millions have died in one of the worst humanitarian calamities of our time. The War That Doesn't Say Its Name investigates the most recent phase of this conflict, asking why the peace deal of 2003— accompanied by the largest United Nations peacekeeping mission in the world and tens of billions in international aid—has failed to stop the violence. Jason Stearns argues that the fighting has become an end in itself, carried forward in substantial part through the apathy and complicity of local and international actors.

Stearns shows that regardless of the suffering, there has emerged a narrow military bourgeoisie of commanders and politicians for whom the conflict is a source of survival, dignity, and profit. Foreign donors provide food and urgent health care for millions, preventing the Congolese state from collapsing, but this involvement has not yielded transformational change. Stearns gives a detailed historical account of this period, focusing on the main players—Congolese and Rwandan states and the main armed groups. He extrapolates from these dynamics to other conflicts across Africa and presents a theory of conflict that highlights the interests of the belligerents and the social structures from which they arise.

Exploring how violence in the Congo has become preoccupied with its own reproduction, *The War That Doesn't Say Its Name* sheds light on why certain military feuds persist without resolution.

We Are Not Born Submissive

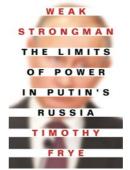

Manon Garcia 9780691223209 £18.99 • \$22.95 Trade Paperback Philosophy / Political January 2023 Princeton University Press

A philosophical exploration of female submission, using insights from feminist thinkers —especially Simone de Beauvoir—to reveal the complexities of women's reality and lived experience

What role do women play in the perpetuation of patriarchy? On the one hand, popular media urges women to be independent, outspoken, and career-minded. Yet, this same media glorifies a specific, sometimes voluntary, female submissiveness as a source of satisfaction. In philosophy, even less has been said on why women submit to men and the discussion has been equally contradictory— submission has traditionally been considered a vice or pathology, but female submission has been valorized as innate to women's nature. Is there a way to explore female submission in all of its complexity—not denying its appeal in certain instances, and not buying into an antifeminist, sexist, or misogynistic perspective?

We Are Not Born Submissive offers the first in-depth philosophical exploration of female submission, focusing on the thinking of Simone de Beauvoir, and more recent work in feminist philosophy, epistemology, and political theory. Manon Garcia argues that to comprehend female submission, we must invert how we examine power and see it from the woman's point of view. Historically, philosophers, psychoanalysts, and even some radical feminists have conflated femininity and submission. Garcia demonstrates that only through the lens of women's lived experiences—their economic, social, and political situations—and how women adapt their preferences to maintain their own well-being, can we understand the ways in which gender hierarchies in society shape women's experiences. Ultimately, she asserts that women do not actively choose submission. Rather, they consent to—and sometimes take pleasure in—what is prescribed to them through social norms within a patriarchy.

Moving beyond the simplistic binary of natural destiny or moral vice, *We Are Not Born Submissive* takes a sophisticated look at how female submissiveness can be explained.

Weak Strongman

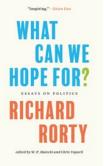

Timothy Frye 9780691216997 £17.99 • \$21.95 Trade Paperback Political Science / World / Russian & Former Soviet Union September 2022 Princeton University Press

Looking beyond Putin to understand how today's Russia actually works

Media and public discussion tends to understand Russian politics as a direct reflection of Vladimir Putin's seeming omnipotence or Russia's unique history and culture. Yet Russia is remarkably similar to other autocracies—and recognizing this illuminates the inherent limits to Putin's power. *Weak Strongman* challenges the conventional wisdom about Putin's Russia, highlighting the difficult trade-offs that confront the Kremlin on issues ranging from election fraud and repression to propaganda and foreign policy.

Drawing on three decades of his own on-the-ground experience and research as well as insights from a new generation of social scientists that have received little attention outside academia, Timothy Frye reveals how much we overlook about today's Russia when we focus solely on Putin or Russian exceptionalism. Frye brings a new understanding to a host of crucial questions: How popular is Putin? Is Russian propaganda effective? Why are relations with the West so fraught? Can Russian cyber warriors really swing foreign elections? In answering these and other questions, Frye offers a highly accessible reassessment of Russian politics that highlights the challenges of governing Russia and the nature of modern autocracy.

Rich in personal anecdotes and cutting-edge social science, *Weak Strongman* offers the best evidence available about how Russia actually works.

What Can We Hope For?

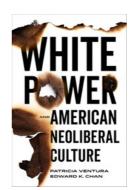

Richard Rorty 9780691222905 £14.99•\$17.95 Trade Paperback Philosophy / Political October 2023 Princeton University Press

Prescient essays about the state of our politics from the philosopher who predicted that a populist demagogue would become president of the United States

Richard Rorty, one of the most influential intellectuals of recent decades, is perhaps best known today as the philosopher who, almost two decades before the 2016 U.S. presidential election, warned of the rise of a Trumpian strongman in America. *What Can We Hope For?* gathers nineteen of Rorty's essays on American and global politics, including four previously unpublished and many lesser-known and hard-to-find pieces.

In these provocative and compelling essays, Rorty confronts the critical challenges democracies face at home and abroad, including populism, growing economic inequality, and overpopulation and environmental devastation. In response, he offers optimistic and realistic ideas about how to address these crises. He outlines strategies for fostering social hope and building an inclusive global community of trust, and urges us to put our faith in trade unions, universities, bottom-up social campaigns, and bold political visions that thwart ideological pieties.

Driven by Rorty's sense of emergency about our collective future, *What Can We Hope For?* is filled with striking diagnoses of today's political crises and creative proposals for solving them.

White Power and American Neoliberal Culture Patricia Ventura

9780520392793 £20.00 • \$22.95 Hardcover Political Science / Political Ideologies April 2023 University of California Press

How two seemingly separate forces—white power and neoliberalism—intersect and polarize the United States today.

White Power and American Neoliberal Culture speaks to the urgency of the present moment by uncovering and examining the ideologies that led us here. Working through sources such as white terrorist manifestos, white power utopian fiction, neoliberal think tank reports, and neoconservative policy statements, Patricia Ventura and Edward K. Chan analyze the conjunction of current forms of white supremacy and racial capitalism.

Short and accessible, this timely book argues that white extremist worldviews—and the violence they provoke—have converged with a radical economic and social agenda to shape daily life in the United States, especially by enshrining the male-dominated white family as the ideal of national identity. Through insightful observation and critical dissection, Ventura and Chan paint a striking portrait of how these forces enable each other, perpetuating social injustice and inequity.

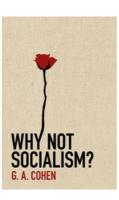

Why Civil Resistance

Works Erica Chenoweth 9780231156837 £22.00 • \$27.00 Trade Paperback Political Science December 2012 Columbia University Press

For more than a century, from 1900 to 2006, campaigns of nonviolent resistance were more than twice as effective as their violent counterparts in achieving their stated goals. By attracting impressive support from citizens, whose activism takes the form of protests, boycotts, civil disobedience, and other forms of nonviolent noncooperation, these efforts help separate regimes from their main sources of power and produce remarkable results, even in Iran, Burma, the Philippines, and the Palestinian Territories.

Combining statistical analysis with case studies of specific countries and territories, Erica Chenoweth and Maria J. Stephan detail the factors enabling such campaigns to succeed and, sometimes, causing them to fail. They find that nonviolent resistance presents fewer obstacles to moral and physical involvement and commitment, and that higher levels of participation contribute to enhanced resilience, greater opportunities for tactical innovation and civic disruption (and therefore less incentive for a regime to maintain its status quo), and shifts in loyalty among opponents' erstwhile supporters, including members of the military establishment.

Chenoweth and Stephan conclude that successful nonviolent resistance ushers in more durable and internally peaceful democracies, which are less likely to regress into civil war. Presenting a rich, evidentiary argument, they originally and systematically compare violent and nonviolent outcomes in different historical periods and geographical contexts, debunking the myth that violence occurs because of structural and environmental factors and that it is necessary to achieve certain political goals. Instead, the authors discover, violent insurgency is rarely justifiable on strategic grounds.

Why Not Socialism?

G. A. Cohen 9780691143613 £8.99 • \$10.95 Hardcover Philosophy / Political September 2009 Princeton University Press

A compelling case for why it's time for socialism

Is socialism desirable? Is it even possible? In this concise book, one of the world's leading political philosophers presents with clarity and wit a compelling moral case for socialism and argues that the obstacles in its way are exaggerated.

There are times, G. A. Cohen notes, when we all behave like socialists. On a camping trip, for example, campers wouldn't dream of charging each other to use a soccer ball or for fish that they happened to catch. Campers do not give merely to get, but relate to each other in a spirit of equality and community. Would such socialist norms be desirable across society as a whole? Why not? Whole societies may differ from camping trips, but it is still attractive when people treat each other with the equal regard that such trips exhibit.

But, however desirable it may be, many claim that socialism is impossible. Cohen writes that the biggest obstacle to socialism isn't, as often argued, intractable human selfishness—it's rather the lack of obvious means to harness the human generosity that is there. Lacking those means, we rely on the market. But there are many ways of confining the sway of the market: there are desirable changes that can move us toward a socialist society in which, to quote Albert Einstein, humanity has "overcome and advanced beyond the predatory stage of human development."

Wollstonecraft

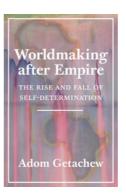

Sylvana Tomaselli 9780691241753 £18.99 • \$22.95 Trade Paperback Philosophy / Political September 2022 Princeton University Press

A compelling portrait of Mary Wollstonecraft that shows the intimate connections between her life and work

Mary Wollstonecraft's *A Vindication of the Rights of Woman*, first published in 1792, is a work of enduring relevance in women's rights advocacy. However, as Sylvana Tomaselli shows, a full understanding of Wollstonecraft's thought is possible only through a more comprehensive appreciation of Wollstonecraft herself, as a philosopher and moralist who deftly tackled major social and political issues and the arguments of such figures as Edmund Burke, Jean-Jacques Rousseau, and Adam Smith. Reading Wollstonecraft through the lens of the politics and culture of her own time, this book restores her to her rightful place as a major eighteenth-century thinker, reminding us why her work still resonates today.

The book's format echoes one that Wollstonecraft favored in *Thoughts on the Education of Daughters*: short essays paired with concise headings. Under titles such as "Painting," "Music," "Memory," "Property and Appearance," and "Rank and Luxury," Tomaselli explores not only what Wollstonecraft enjoyed and valued, but also her views on society, knowledge and the mind, human nature, and the problem of evil—and how a society based on mutual respect could fight it. The resulting picture of Wollstonecraft reveals her as a particularly engaging author and an eloquent participant in enduring social and political concerns.

Drawing us into Wollstonecraft's approach to the human condition and the debates of her day, *Wollstonecraft* ultimately invites us to consider timeless issues with her, so that we can become better attuned to the world as she saw it then, and as we might wish to see it now.

Worldmaking after Empire

Adom Getachew 9780691202341 £22.00 • \$27.95 Trade Paperback Philosophy / Political April 2020 Princeton University Press

Decolonization revolutionized the international order during the twentieth century. Yet standard histories that present the end of colonialism as an inevitable transition from a world of empires to one of nations—a world in which self-determination was synonymous with nation-building—obscure just how radical this change was. Drawing on the political thought of anticolonial intellectuals and statesmen such as Nnamdi Azikiwe, W.E.B Du Bois, George Padmore, Kwame Nkrumah, Eric Williams, Michael Manley, and Julius Nyerere, this important new account of decolonization reveals the full extent of their unprecedented ambition to remake not only nations but the world.

Adom Getachew shows that African, African American, and Caribbean anticolonial nationalists were not solely or even primarily nation-builders. Responding to the experience of racialized sovereign inequality, dramatized by interwar Ethiopia and Liberia, Black Atlantic thinkers and politicians challenged international racial hierarchy and articulated alternative visions of worldmaking. Seeking to create an egalitarian postimperial world, they attempted to transcend legal, political, and economic hierarchies by securing a right to self-determination within the newly founded United Nations, constituting regional federations in Africa and the Caribbean, and creating the New International Economic Order.

Using archival sources from Barbados, Trinidad, Ghana, Switzerland, and the United Kingdom, *Worldmaking after Empire* recasts the history of decolonization, reconsiders the failure of anticolonial nationalism, and offers a new perspective on debates about today's international order.
